

CONTENTS

PREFACE

CHAPTER I : LINEAR DIFFERENCE EQUATIONS

§ 1. Introduction.	1
§ 2. Formal solutions and canonical forms.	4
§ 3. Asymptotics. Gevrey classes of series and functions.	9
§ 4. Right inverses of linear difference operators.	13

CHAPTER II : EXISTENCE PROOFS FOR RIGHT INVERSES OF DIFFERENCE OPERATORS

§ 5. A transformation from left to right.	21
§ 6. A canonical form of $\Lambda_{g,a,r}^{S(R)}$.	22
§ 7. Definition of Λ^C . Introductory remarks.	25
§ 8. Two preparatory lemmas.	28
§ 9. Proof of proposition 4.3.	32
§10. Proof of proposition 4.9.	59
§11. Proof of proposition 4.16.	62
§12. Proofs of propositions 4.11 and 4.12.	69

CHAPTER III: NONLINEAR DIFFERENCE EQUATIONS

§13. Introduction.	76
§14. Preliminaries.	77
§15. The main results.	81
§16. Existence of formal solutions belonging to a Gevrey class.	92
§17. Block-diagonalization and τ -triangularization theorems.	108
§18. Application to canonical forms.	117
