Preface	v
<u>CHAPTER 1</u> Preliminaries	1
1.1 Notations	1
1.2 Difference Equations	2
1.3 Initial Value Problems	4
1.4 Some Examples: Initial Value Problems	7
1.5 Boundary Value Problems	12
1.6 Some Examples: Boundary Value Problems	14
1.7 Finite Difference Calculus	23
1.8 Problems	33
1.9 Notes	42
1.10 References	42
<u>CHAPTER 2</u> Linear Initial Value Problems	46
2.1 Introduction	47
2.2 Preliminary Results from Algebra	47
2.3 Linear Dependence and Independence	53
2.4 Matrix Linear Systems	55
2.5 Variation of Constants Formula	57
2.6 Green's Matrix	58
2.7 Adjoint Systems	59
2.8 Systems with Constant Coefficients	60
2.9 Periodic Linear Systems	68
2.10 Higher Order Linear Equations	71
2.11 Method of Generating Functions	77
2.12 Bernoulli's Method	82
2.13 Poincaré's and Perron's Theorems	84
2.14 Regular and Singular Perturbations	88
2.15 Problems	95
2.16 Notes	108
2.17 References	109

CHAPTER 3	Miscellaneous Difference Equations	111
3.1	Clairaut's Equation	112
3.2	Euler's Equation	113
3.3	Riccati's Equation	115
3.4	Bernoulli's Equation	118
3.5	Verhulst's Equation	119
3.6	Best Discrete Approximations: Harmonic Oscillator Equation	121
3.7	Duffing's Equation	123
3.8	van der Pol's Equation	129
3.9	Hill's Equation	137
3.10	Mathieu's Equation	142
3.11	Weierstrass' Elliptic Equations	143
3.12	Volterra's Equations	145
3.13	Elementary Partial Difference Equations: Riccati's Extended Form	147
3.14	Wave Equation	154
3.15	FitzHugh-Nagumo's Equation	156
3.16	Korteweg-de Vries' Equation	157
3.17	Modified KdV Equation	157
3.18	Lagrange's Equations	158
3.19	Problems	164
3.20	Notes	177
3.21	References	178
CHAPTER 4	Difference Inequalities	181
4.1	Gronwall Inequalities	182
4.2	Nonlinear Inequalities	190
4.3	Inequalities Involving Differences	197
4.4	Finite Systems of Inequalities	202
4.5	Opial's Type Inequalities	206
4.6	Problems	210
4.7	Notes	217
4.8	References	218

CHAPTER 5	Qualitative Properties of Solutions of Difference Systems	221
5.1	Dependence on Initial Conditions and Parameters	222
5.2	Asymptotic Behaviour of Linear Systems	226
5.3	Asymptotic Behaviour of Nonlinear Systems	237
5.4	Concepts of Stability	239
5.5	Stability of Linear Systems	245
5.6	Stability of Nonlinear Systems	254
5.7	Nonlinear Variation of Constants	261
5.8	Dichotomies	264
5.9	Lyapunov's Direct Method for Autonomous Systems	275
5.10	Lyapunov's Direct Method for Non-Autonomous Systems	283
5.11	Stability of Discrete Models in Population Dynamics	287
5.12	Converse Theorems	294
5.13	Total Stability	300
5.14	Practical Stability	303
5.15	Mutual Stability	304
5.16	Problems	306
5.17	Notes	313
5.18	References	315
CHAPTER 6	Qualitative Properties of Solutions of Higher Order Difference Equations	322
6.1	General Properties of Solutions of (6.1.1) $p(k)u(k+1)+p(k-1)u(k-1)=q(k)u(k)$	323
6.2	Boundedness of Solutions of (6.1.1)	325
6.3	Recessive and Dominant Solutions of (6.1.1)	329
6.4	Oscillation and Nonoscillation for (6.1.1)	336
6.5	Riccati Type Transformations for (6.1.1)	337
6.6	Riccati Type Transformations for (6.6.1) $\Delta(p(k)\Delta u(k))+r(k)u(k+1)=0$	343
6.7	Olver's Type Comparison Results	350
6.8	Sturm's Type Comparison Results	353

6.9	Variety of Properties of Solutions of (6.9.1) $p(k)z(k+1)+p(k-1)z(k-1)$ $=q(k)z(k)+r(k)$	356
6.10	Variety of Properties of Solutions of (6.10.1) $\Delta^2 u(k-1)+p(k)u^\gamma(k)=0$	360
6.11	Oscillation and Nonoscillation for (6.11.1) $\Delta(r(k)\Delta u(k))+f(k)F(u(k))=0$	369
6.12	Asymptotic Behaviour of Solutions of (6.12.1) $\Delta(r(k)\Delta u(k))+f(k)F(u(k))=g(k)$	375
6.13	ℓ_2 and c_0 solutions of (6.13.1) $\Delta^2 u(k)+f(k, u(k))=0$	378
6.14	Oscillation and Nonoscillation for (6.14.1) $\Delta_\alpha^2 u(k)=f(k, u(k), \Delta_\beta u(k))$	382
6.15	Oscillation and Nonoscillation for (6.15.1) $\Delta(r(k)\Delta u(k))+f(k)F(k, u(k), \Delta u(k))$ $=g(k, u(k), \Delta u(k))$	384
6.16	Variety of Properties of Solutions of (6.16.1) $\Delta^4 u(k-2)=p(k)u(k)$	388
6.17	Asymptotic Behaviour of Solutions of (6.17.1) $\Delta^n u(k)+f(k, u(k), \Delta u(k), \dots, \Delta^{n-1} u(k))=0$	396
6.18	Asymptotic Behaviour, Oscillation and Nonoscillation for (6.18.1) $\Delta^n u(k)+h(k)F(k, u(k), \Delta u(k), \dots, \Delta^{n-1} u(k))$ $=g(k, u(k), \Delta u(k), \dots, \Delta^{n-1} u(k))$	400
6.19	Oscillation and Nonoscillation for (6.19.1) $\Delta^n u(k)+\sum_{i=1}^m f_i(k)F_i(u(k), \Delta u(k), \dots,$ $\Delta^{n-1} u(k))=0$	406
6.20	Oscillation and Nonoscillation for (6.20.1) $u(k+1)-u(k)+p(k)u(k-m)=0$	413
6.21	Oscillation and Nonoscillation for (6.21.1) $\delta \Delta_\alpha u(k)+\delta \sum_{i=1}^m f_i(k)F_i(u(g_i(k)))=0$	418
6.22	Problems	422
6.23	Notes	436
6.24	References	437

CHAPTER 7	Boundary Value Problems for Linear Systems	444
7.1	Existence and Uniqueness	444
7.2	Method of Complementary Functions	449
7.3	Method of Particular Solutions	459
7.4	Method of Adjoins	460
7.5	Method of Chasing	469
7.6	Method of Imbedding: First Formulation	475
7.7	Method of Imbedding: Second Formulation	481
7.8	Method of Sweep	486
7.9	Miller's and Olver's Algorithms	492
7.10	Problems	495
7.11	Notes	498
7.12	References	499
CHAPTER 8	Boundary Value Problems for Nonlinear Systems	504
8.1	Preliminary Results from Analysis	505
8.2	Existence and Uniqueness	507
8.3	Approximate Picard's Iterates	515
8.4	Oscillatory State	520
8.5	Stopping Criterion	522
8.6	Application to the Perturbation Method	524
8.7	Monotone Convergence	528
8.8	Newton's Method	533
8.9	Approximate Newton's Method	539
8.10	Initial-Value Methods	544
8.11	Invariant Imbedding Method	551
8.12	Problems	554
8.13	Notes	560
8.14	References	561
CHAPTER 9	Miscellaneous Properties of Solutions of Higher Order Linear Difference Equations	566
9.1	Disconjugacy	567
9.2	Right and Left Disconjugacy	568

9.3	Adjoint Equations	572
9.4	Right and Left Disconjugacy for the Adjoint Equation	574
9.5	Right Disfocality	575
9.6	Eventual Disconjugacy and Right Disfocality	578
9.7	A Classification of Solutions	578
9.8	Interpolating Polynomials	581
9.9	Green's Functions	585
9.10	Inequalities and Equalities for Green's Functions	595
9.11	Maximum Principles	597
9.12	Error Estimates in Polynomial Interpolation	598
9.13	Notes	600
9.14	References	601
 CHAPTER 10 Boundary Value Problems for Higher Order Difference Equations		606
10.1	Existence and Uniqueness	607
10.2	Picard's and Approximate Picard's Methods	614
10.3	Quasilinearization and Approximate Quasilinearization	622
10.4	Monotone Convergence	631
10.5	Initial-Value Methods	637
10.6	Uniqueness Implies Existence	648
10.7	Problems	656
10.8	Notes	659
10.9	References	659
 CHAPTER 11 Sturm-Liouville Problems and Related Inequalities		662
11.1	Sturm-Liouville Problems	662
11.2	Eigenvalue Problems for Symmetric Matrices	667
11.3	Matrix Formulation of Sturm-Liouville Problems	669
11.4	Symmetric, Antisymmetric and Periodic Boundary Conditions	670
11.5	Discrete Fourier Series	675
11.6	Wirtinger's Type Inequalities	677

11.7	Generalized Wirtinger's Type Inequalities	684
11.8	Generalized Opial's Type Inequalities	686
11.9	Comparison Theorems for Eigenvalues	688
11.10	Problems	693
11.11	Notes	704
11.12	References	705
 CHAPTER 12 Difference Inequalities in Several Independent Variables		709
12.1	Discrete Riemann's Function	709
12.2	Linear Inequalities	713
12.3	Wendroff's Type Inequalities	716
12.4	Nonlinear Inequalities	720
12.5	Inequalities Involving Partial Differences	723
12.6	Multidimensional Linear Inequalities	731
12.7	Multidimensional Nonlinear Inequalities	734
12.8	Convolution Type Inequalities	741
12.9	Opial's and Wirtinger's Type Inequalities in Two Variables	744
12.10	Problems	752
12.11	Notes	755
12.12	References	756
 Name Index		760
 Subject Index		769
