TABLE OF CONTENTS

Preface ix

Chapter 1
THE ABSTRACT CAUCHY PROBLEM

1. WELL-POSEDNESS OF THE DIFFERENTIAL CAUCHY PROBLEM IN $C(E)$ 1
   1. The Cauchy problem in a Banach space E. Definition of well-posedness in $C(E)$ 1
   2. Examples of well-posed and ill-posed problems in $C(E)$ 4
   3. The homogeneous equation. Strongly continuous semigroups 5
   4. The nonhomogeneous equation. Analytic semigroups 7
   5. Well-posedness in $C(E)$ of the general Cauchy problem 10
2. WELL-POSEDNESS OF THE CAUCHY PROBLEM IN $C_0^\alpha(E)$ 14
   1. The homogeneous problem. The space $C_0^\alpha(E)$ 14
   2. Well-posedness in $C_0^\alpha(E)$ of the general Cauchy problem 16
3. WELL-POSEDNESS OF THE CAUCHY PROBLEM IN $L_p(E)$ 21
   1. Definition of the well-posedness of the Cauchy problem in $L_p(E)$ 21
   2. A formula for the solution of the Cauchy problem in $L_p(E)$ 23
   3. Spaces of initial data 24
   4. The values of the solution of the Cauchy problem in $L_p(E)$ for fixed t 26
   5. The coercivity inequality for the solutions in $L_p(E)$ of the general problem (1.1) 28
4. WELL-POSEDNESS OF THE CAUCHY PROBLEM IN $L_p(E_{\alpha,q})$ 36
5. WELL-POSEDNESS OF THE CAUCHY PROBLEM IN SPACES OF SMOOTH FUNCTIONS 43
   1. The space $C_0^{\beta,\gamma}(E)$. The nonhomogeneous problem 43
   2. Well-posedness of the general problem 48
   3. Semigroup estimates 53
   4. The coercivity inequality for the general problem 58

Chapter 2
THE ROTHE DIFFERENCE SCHEME

0. STABILITY OF THE DIFFERENCE PROBLEM 71
1. The difference problem 71
2. Banach spaces of grid functions 72
3. The operator equation in $\mathcal{E}(E)$. Definition of the stability of the difference scheme 73
4. Stability of the difference scheme 75

1. WELL-POSEDNESS OF THE DIFFERENCE PROBLEM IN $C(E)$ ... 81
1. The homogeneous difference problem 81
2. The nonhomogeneous problem. A real-field criterion for analyticity 83
3. An almost coercive inequality in $C(E)$ 86

2. WELL-POSEDNESS OF THE DIFFERENCE PROBLEM IN $C_0^{\alpha}(E)$ 90

3. WELL-POSEDNESS OF THE DIFFERENCE PROBLEM IN $\mathcal{L}_p(E)$ 97
1. Definition of the well-posedness of the difference problem in $\mathcal{L}_p(E)$ .. 97
2. Spaces of initial data 98
3. The coercivity inequality for the solutions in $\mathcal{L}_p(E)$ of the general problem (0.6) 104

4. WELL-POSEDNESS OF THE DIFFERENCE PROBLEM IN $\mathcal{L}_p(E_{\alpha,q})$ 116
1. Strongly positive operators and fractional spaces 116
2. Well-posedness of the difference problem in $\mathcal{L}_p(E'_{\alpha,q})$ 123

5. WELL-POSEDNESS OF THE DIFFERENCE PROBLEM IN DIFFERENCE ANALOGUES OF SPACES OF SMOOTH FUNCTIONS 130
1. The space $C_0^{\beta,\gamma}(E)$. The nonhomogeneous difference problem 130
2. Well-posedness of the general difference problem 136
3. Estimates for powers of the resolvent 142
4. The coercivity inequality for the general problem 145

Chapter 3
PADÉ DIFFERENCE SCHEMES

0. STABILITY OF THE DIFFERENCE PROBLEM 157
1. Padé approximants of the function e^{-z} 157
2. Difference schemes of Padé class 169

1. WELL-POSEDNESS OF THE DIFFERENCE PROBLEM IN $C(E)$ ... 175
1. The homogeneous problem 175
2. The nonhomogeneous problem 180

3. Sufficient conditions for almost-well-posedness. A real-field criterion for analyticity 184
4. Estimates of powers of the operator step 188

2. WELL-POSEDNESS OF THE DIFFERENCE PROBLEM IN $\mathcal{C}_0^\alpha(E)$ 192
1. The case of a general space $\mathcal{C}_0^\alpha(E)$ 192
2. The case of the special space $\tilde{\mathcal{C}}_0^\alpha(E)$ 201

3. WELL-POSEDNESS OF THE DIFFERENCE PROBLEM IN $\mathcal{L}_p(E)$ 208
1. Definition of the well-posedness of the difference problem in $\mathcal{L}_p(E)$. Stability of the difference problem 208
2. Spaces of initial data. Well-posedness of the difference problem 210
3. Estimates of powers of the operator step 215

4. WELL-POSEDNESS OF THE DIFFERENCE PROBLEM IN $\mathcal{L}_p(E'_{\alpha,q})$ 220
1. Stability of the difference problem 220
2. Well-posedness of the difference problem 222

5. WELL-POSEDNESS OF THE DIFFERENCE PROBLEM IN DIFFERENCE ANALOGUES OF SPACES OF SMOOTH FUNCTIONS 227
1. Well-posedness of the difference problem in $\mathcal{C}_0^{\beta,\gamma}(E)$ 227
2. Estimates of powers of the operator step. The coercivity inequality for the general problem 233

Chapter 4
DIFFERENCE SCHEMES FOR PARABOLIC EQUATIONS

1. ELLIPTIC DIFFERENCE OPERATORS WITH CONSTANT COEFFICIENTS 241
1. The definition of an elliptic difference operator and properties of its symbol 241
2. A formula for the solution of the resolvent equation 247
3. Point estimates for the fundamental solution of the resolvent equation 252
4. Sharpening of the point estimates of the fundamental solution of the resolvent equation 259
5. Positivity of homogeneous elliptic difference operators with constant coefficients 267
6. Point estimates of the fundamental solution of the resolvent equation in the case $m \leq n$ 269
7. Point estimates of difference derivatives of the fundamental solution of the resolvent equation 273

2. FRACTIONAL SPACES IN THE CASE OF AN ELLIPTIC DIFFERENCE OPERATOR 283
1. The fractional spaces $E'_{\alpha,\infty}(C_h, A_h)$ 283
2. Positivity of the elliptic difference operator in L_{1h}. The fractional spaces $E'_{\alpha,1}(L_{1h}, A_h)$ 295
3. Positivity of elliptic difference operators in L_{ph}. The fractional spaces $E'_{\alpha,p}(L_{ph}, A_h)$ 304
4. The coercivity inequality for an elliptic difference operator in $C^{m\alpha}(\mathbf{R}_h^n)$ and $W_p^{m\alpha}(\mathbf{R}_h^n)$ 318
5. Elliptic difference operators in $\mathcal{L}_{2h}$ 320

3. STABILITY AND COERCIVITY ESTIMATES 322
I. Approximation with respect to the space variables 322
II. Approximation with respect to the time variable 323

Comments on the Literature 327
