

CONTENTS

Preface/vii

1. THE DIFFERENCE CALCULUS\1

- 1.1. Genesis of Difference Equations\1
- 1.2. Definitions\6
- 1.3. Derivation of Difference Equations\9
- 1.4. Existence and Uniqueness Theorem\12
- 1.5. Operators Δ and E \12
- 1.6. Elementary Difference Operators\16
- 1.7. Factorial Polynomials\22
- 1.8. Operator Δ^{-1} and the Sum Calculus\33

2. FIRST-ORDER DIFFERENCE EQUATIONS\46

- 2.1. Introduction\46
- 2.2. General Linear Equation\46
- 2.3. $y_{k+1} - y_k = (n + 1)k^n$ \53
- 2.4. $y_{k+1} = R_k y_k$ \56
- 2.5. Continued Fractions\58
- 2.6. $y_{k+1} - ky_k = P_k$ \62
- 2.7. A General First-Order Equation: Geometrical Methods\64
- 2.8. A General First-Order Equation: Expansion Techniques\68

3. LINEAR DIFFERENCE EQUATIONS\88

- 3.1. Introduction\88
- 3.2. Linearly Independent Functions\92
- 3.3. Fundamental Theorems for Homogeneous Equations\95
- 3.4. Inhomogeneous Equations\100
- 3.5. Second-Order Equations\106
- 3.6. Sturm-Liouville Difference Equations\114

4. LINEAR DIFFERENCE EQUATIONS WITH CONSTANT COEFFICIENTS\123
 - 4.1. Introduction\123
 - 4.2. Homogeneous Equations\123
 - 4.3. Construction of a Difference Equation Having Specified Solutions\136
 - 4.4. Relationship Between Linear Difference and Differential Equations\139
 - 4.5. Inhomogeneous Equations: Method of Undetermined Coefficients\141
 - 4.6. Inhomogeneous Equations: Operator Methods\150
 - 4.7. z-Transform Method \159
 - 4.8. Systems of Difference Equations\173

5. LINEAR PARTIAL DIFFERENCE EQUATIONS\177
 - 5.1. Introduction\177
 - 5.2. Symbolic Methods\179
 - 5.3. Lagrange's and Separation of Variables Methods\186
 - 5.4. Laplace's Method\195
 - 5.5. Particular Solutions\198
 - 5.6. Simultaneous Equations with Constant Coefficients\205

6. NONLINEAR DIFFERENCE EQUATIONS\208
 - 6.1. Introduction\208
 - 6.2. Homogeneous Equations\208
 - 6.3. Riccati Equations\209
 - 6.4. Clairaut's Equation\214
 - 6.5. Nonlinear Transformations, Miscellaneous Forms\216
 - 6.6. Partial Difference Equations\223

7. APPLICATIONS\227
 - 7.1. Introduction\227
 - 7.2. Mathematics\228
 - 7.3. Perturbation Techniques\253

7.4. Stability of Fixed Points\	263
7.5. The Logistic Equation\	272
7.6. Numerical Integration of Differential Equations\	290
7.7. Physical Systems\	307
7.8. Economics\	318
7.9. Warfare\	337
7.10. Biological Sciences\	348
7.11. Social Sciences\	374
7.12. Miscellaneous Applications\	388
PROBLEMS\	391
APPENDIX\	429
NOTES AND REFERENCES\	437
BIBLIOGRAPHY\	441
INDEX\	443
