PREFACE	xv
Acknowledgements	xix
COURSE ADOPTION	xxi
1 SEQUENCES AND DIFFERENCE OPERATORS	1
1.1 Sequences	1
1.2 Difference Operators	13
1.3 The Inverse Difference Operator as a Sum Operator	33
2 SUM CALCULUS AND THE DISCRETE TRANSFORMS METHODS	41
2.1 Difference Equations	41
2.2 Summation by Parts and The Fundamental Theorem of Sum Calculus	57
2.3 Discrete Transforms and Review of Integral and Finite Transforms	65
2.4 The Discrete Fourier Transforms and Their Sum Calculus Method	95
3 BASIC METHODS OF SOLVING LINEAR DIFFERENCE EQUATIONS	139
3.1 Fundamentals of Linear Difference Equations	139
3.2 Solutions of Homogeneous Difference Equations with Constant Coefficients	157

3.3	Nonhomogeneous Difference Equations with Constant Coefficients	171
3.4	Linear System of Difference Equations with Constant Coefficients	197
3.5	Linear Partial Difference Equations with Constant Coefficients	204
3.6	First Order Difference Equations with Variable Coefficients	225
3.7	Linear Second Order Difference Equations with Variable Coefficients	240
3.8	Convergence, Equilibrium, and Stability of Linear Equations	270
4	DISCRETE FOURIER TRANSFORMS	281
4.1	Continuous to Discrete	281
4.2	Properties of the Discrete Fourier Transform (DFT)	285
4.3	Sine - Cosine (DST & DCT) Form of the DFT	297
4.4	Solution of a Difference Equation by the DFT-Traffic Network	303
4.5	Further Properties of the DFT for its Operational Sum Calculus Method	313
4.6	The Fast Fourier Transform	321
5	THE DISCRETE SINE (DST) AND COSINE (DCT) TRANSFORMS FOR BOUNDARY VALUE PROBLEMS	329
5.1	Establishing the Discrete Sine and Cosine Transforms	330
5.2	Solution of Difference Equations with Boundary Conditions by DST and DCT	340
6	THE z-TRANSFORM FOR INITIAL VALUE PROBLEMS	355
6.1	Discrete Initial Value Problems for the z -Transform	355
6.2	The z -Transform	359
6.3	The Operational Sum Calculus Method of the z -Transform for Solving Initial Value Problems	375

7	MODELING WITH DIFFERENCE EQUATIONS	385
7.1	Various Discrete Problems Modeled as Difference Equations	386
7.2	Solution of the Altruistic Neighborhood Modeled by DCT	398
	REFERENCES	405
	ANSWERS TO EXERCISES	409
	INDEX OF NOTATIONS	425
	SUBJECT INDEX	431
