Chapter 1	
THE DIFFERENCE CALCULUS	1
Operators. Some Definitions Involving Operators. Algebra of Operators. The Difference Operator. The Translation or Shifting Operator. The Derivative Operator. The Differential Operator. Relationship Between Difference, Derivative and Differential Operators. General Rules of Differentiation. Derivatives of Special Functions. General Rules of the Difference Calculus. Factorial Polynomials. Stirling Numbers. Generalized Factorial Functions. Differences of Special Functions. Taylor Series. Taylor Series in Operator Form. The Gregory-Newton Formula. Leibnitz's Rule. Other Difference Operators.	
<hr/>	
Chapter 2	
APPLICATIONS OF THE DIFFERENCE CALCULUS	32
Subscript Notation. Difference Tables. Differences of Polynomials. Gregory-Newton Formula in Subscript Notation. General Term of a Sequence or Series. Interpolation and Extrapolation. Central Difference Tables. Generalized Interpolation Formulas. Zig-Zag Paths and Lozenge Diagrams. Lagrange's Interpolation Formula. Tables with Missing Entries. Divided Differences. Newton's Divided Difference Interpolation Formula. Inverse Interpolation. Approximate Differentiation.	
<hr/>	
Chapter 3	
THE SUM CALCULUS	79
The Integral Operator. General Rules of Integration. Integrals of Special Functions. Definite Integrals. Fundamental Theorem of Integral Calculus. Some Important Properties of Definite Integrals. Some Important Theorems of Integral Calculus. The Sum Operator. General Rules of Summation. Summations of Special Functions. Definite Sums and the Fundamental Theorem of Sum Calculus. Differentiation and Integration of Sums. Theorems on Summation Using the Subscript Notation. Abel's Transformation. Operator Methods for Summation. Summation of Series. The Gamma Function. Bernoulli Numbers and Polynomials. Important Properties of Bernoulli Numbers and Polynomials. Euler Numbers and Polynomials. Important Properties of Euler Numbers and Polynomials.	
<hr/>	
Chapter 4	
APPLICATIONS OF THE SUM CALCULUS	121
Some Special Methods for Exact Summation of Series. Series of Constants. Power Series. Approximate Integration. Error Terms in Approximate Integration Formulas. Gregory's Formula for Approximate Integration. The Euler-Maclaurin Formula. Error Term in Euler-Maclaurin Formula. Stirling's Formula for $n!$
