

The Cambridge Encyclopedia of Language is organized in 11 Parts, comprising 65 thematic sections. Each section is a self-contained presentation of a major theme in language study, with cross-references included to related sections and topics.

Editorial advisors	vi
Preface	vii
<u>I Popular ideas about language</u>	1
Widely held linguistic beliefs and attitudes, and the basic functions of language.	
1 The prescriptive tradition	2
Popular notions of linguistic authority and correctness; purism and language change; the role of linguistic description.	
2 The equality of languages	6
Myths about primitive languages and language superiority.	
3 The magic of language	8
Linguistic superstitions and verbal taboos; the mystical power of proper names.	
4 The functions of language	10
The many cultural, social, and personal roles which language performs.	
5 Language and thought	14
The complex relationship between language and thinking; the notion of language relativity.	
<u>II Language and identity</u>	17
The many ways in which language expresses a person's individuality or social identity.	
6 Physical identity	18
The relationship between language and age, sex, physical type, and physical condition; voiceprints; male vs female speech.	
7 Psychological identity	22
The relationship between language and personality, intelligence, and other psychological factors.	
8 Geographical identity	24
The regional background of a speaker; accents, dialects, linguistic areas, and the study of dialectology.	
9 Ethnic and national identity	34
Language, ethnicity, and nationalism; the problem of minority languages and dialects.	

10 Social identity	38
Language and social stratification, class, status, role, solidarity, and distance; the problem of sexism.	
11 Contextual identity	48
Situationally determined varieties of speech and writing; restricted and secret language; verbal play and art; word games.	
12 Stylistic identity and literature	66
The concept of style; authorship identity and forensic linguistics; literary language in poetry, drama, and prose.	
III The structure of language	81
The dimensions of language analysis that underlie all forms of language, whether spoken, written, or signed.	
13 Linguistic levels	82
The relationship between the main components of language analysis; models of linguistic structure.	
14 Typology and universals	84
Analysing the structural similarities and differences among the languages of the world.	
15 The statistical structure of language	86
The study of the statistical regularities found in language; the frequency of sounds, letters, and words.	
16 Grammar	88
Syntax and morphology; the structure of words, phrases, clauses, and sentences.	
17 Semantics	100
The study of meaning in language; the semantic analysis of words and sentences.	
18 Dictionaries	108
The use and evaluation of dictionaries; the past, present, and future of lexicography.	
19 Names	112
Patterns and trends in the use of personal names; place names and their history.	
20 Discourse and text	116
The study of stretches of spoken and written language above the sentence; the nature of conversation; analysing textual structure.	
21 Pragmatics	120
The factors that govern our choice of language in social interaction; speech acts and their analysis.	

IV The medium of language: speaking and listening 123

The study of the auditory-vocal channel of communication; the production, transmission, and reception of speech.

- 22 The anatomy and physiology of speech** 124
The vocal tract and vocal organs; the nature of articulation.
- 23 The acoustics of speech** 132
The nature of sound waves and the way they transmit speech; the sound spectrograph and its use in speech sound analysis.
- 24 The instrumental analysis of speech** 138
Some of the techniques used in the analysis of speech acoustics and physiology.
- 25 Speech reception** 142
The ear, and the process of hearing; speech perception and its investigation.
- 26 Speech interaction with machines** 149
The principles and practice of automatic speech recognition and speech synthesis.
- 27 The sounds of speech** 152
Phonetics; the description of vowels and consonants; kinds of phonetic transcription.
- 28 The linguistic use of sound** 160
Phonology; phonemes, distinctive features, and other models; comparing the sound systems of languages.
- 29 Suprasegmentals** 169
The prosody of speech; the structure of intonation; tone languages; the relationship between speech and music.
- 30 Sound symbolism** 174
The relationship between sounds and meaning; the role of onomatopoeia.

V The medium of language: writing and reading 177

The study of the development and functions of written language, in all its forms.

- 31 Written and spoken language** 178
The relationship between speech and writing; how sound is portrayed in written language.
- 32 Graphic expression** 182
The physical substance of written language; types of graphic expression; handwriting, print, typing, and electronic forms.
- 33 Graphology** 194
The writing system of a language; the history of writing; the alphabet; spelling, punctuation, and other contrasts; systems of shorthand.
- 34 The process of reading and writing** 208
Psychological accounts of the process of reading, writing, and spelling; spelling regularity and spelling reform.

**VI The medium of language:
signing and seeing** 219

The development and use of deaf sign languages.

- 35 Sign language** 220
Popular fallacies about sign language; the development and use of signs by the deaf.
- 36 Sign language structure** 222
The way signs are used to convey grammatical contrasts; American Sign Language.
- 37 Types of sign language** 224
The range of contrived sign languages; finger spelling, cued speech, and other systems.

VII Child language acquisition 227

The study of the way children learn to understand and speak their mother tongue – methods, theories, and findings; later language learning in school.

- 38 Investigating children's language** 228
Techniques for finding out about child language; speech production and comprehension; theories of language acquisition.
- 39 The first year** 236
The development of infant vocalization; early speech perception and interaction.
- 40 Phonological development** 240
The acquisition of the sound system; the learning of vowels, consonants, and intonation.
- 41 Grammatical development** 242
The acquisition of grammar; growth in sentence length and complexity.
- 42 Semantic development** 244
The acquisition of vocabulary; first words and their content; distinguishing the meanings of words.
- 43 Pragmatic development** 246
The acquisition of conversational skills; the language of twins.
- 44 Language development in school** 248
The study of language in school; later oral development; learning to read and write

**VIII Language, brain, and
handicap** 257

The neurological basis of language, and the range of physical or psychological problems that can give rise to disabilities in spoken, written, or signed language.

- 45 Language and the brain** 258
Brain structure and function; hemispheric dominance and localization; slips of the tongue and critical periods.
-

- 46 Language handicap** 264
Incidence, causation, and classification; deafness, aphasia, dyslexia, dysgraphia; disorders of voice, articulation, and fluency; language delay; alternative communication systems and aids.

IX The languages of the world 283

The range of languages in past or present use – numbers, speakers, sources; identifying and explaining linguistic change.

- 47 How many languages?** 284
Identifying, counting, and classifying the languages of the world.
- 48 How many speakers?** 286
Determining how many people speak a language; the world's most widely used languages and families.
- 49 The origins of language** 288
Myths and experiments about the origins of language; wolf children; humans and primates; the evidence of palaeontology.
- 50 Families of languages** 292
Discovering the history of languages; comparative philology; the language families of the world.
- 51 The Indo-European family** 296
The history of Indo-European languages, where they are spoken, and how they are classified.
- 52 Other families** 304
The distribution, family grouping, and use of the world's languages (other than Indo-European).
- 53 Language isolates** 326
Languages which cannot be related to any of the major families.
- 54 Language change** 328
The identification of change in sounds, grammar, and vocabulary; glottochronology; explanations for language change.
- 55 Pidgins and creoles** 334
The origins, distribution, and present-day use of the world's pidgins and creoles.

X Language in the world 341

The problems of communication posed by the diversity of the world's languages and varieties, and the search for solutions.

- 56 The language barrier** 342
The problems caused by foreign languages in the field of international communication; language and the business world.
- 57 Translating and interpreting** 344
The principles and practice of translating and interpreting; the role of machine translation.
-

58 Artificial languages	352
The history of artificial languages, and the present-day position; Esperanto, Basic English, and other systems.	
59 World languages	357
The international use of languages; official languages; World English and its varieties.	
60 Multilingualism	360
Causes and extent of bilingual attitudes and practice; language maintenance and shift; language switching.	
61 Language planning	364
Government policies about language selection and use; bilingual educational programmes.	
62 Foreign language learning and teaching	368
The role and status of foreign languages in school and society; theories of language learning, and methods of language teaching; language materials and laboratories.	
63 Language for special purposes	378
The development of special varieties of language in science, medicine, religion, the law, the press, advertising, and broadcasting; the related problems of intelligibility and change.	

XI Language and communication

395

The relationship between language and other systems of human and non-human communication, and the scientific study of language.

64 Language and other communication systems	396
Language defined; chimpanzee communication; semiotics; communication by non-linguistic sound, face, gesture, and touch.	
65 Linguistics	404
The history of ideas in language study; domains and personalities in 20th-century linguistics; linguistic methods.	

Appendices

I Glossary.	414
II Special symbols and abbreviations used in the encyclopedia.	43
III Table of the world's languages.	43
IV Further reading.	44
V References.	44
VI Index of languages, families, dialects, and scripts.	45
VII Index of authors and personalities.	45
VIII Index of topics.	45
