

# CONTENTS

PREFACE . . . . .	xi
Chapter 1. GENERAL VARIATIONAL STUDY OF THE ULAM PROBLEM . . . . .	1
§1. Regularity of the Lumped Constraints . . . . .	3
§2. The Maximum Principle . . . . .	4
§3. Analysis of the Local Maximum Principle . . . . .	8
§4. Stationary Sets . . . . .	17
§5. Operation of Parallel Displacement of Vectors on Surfaces and Equations (20) of a Stationary Set . . . . .	20
§6. Standard Regimes . . . . .	22
Chapter 2. OPTIMAL MOTION OF SEGMENTS IN THE $n$ -DIMENSIONAL SPACE AND ON THE $n$ -DIMENSIONAL SPHERE . . . . .	29
§1. The Sliding Regime . . . . .	30
§2. The Rotating Regime . . . . .	33
§3. The Degenerate Regime . . . . .	36
Chapter 3. OPTIMAL MOTION OF SEGMENTS ON THE CIRCULAR CYLINDER . . . . .	47
§1. The Sliding Regime . . . . .	48
§2. The Rotating Regime . . . . .	53
§3. The Degenerate Regime . . . . .	59
§4. Description of Extremals . . . . .	61

Chapter 4. OPTIMAL MOTION OF SEGMENTS ON THE ANISOTROPIC PLANE . . . . . 65

Chapter 5. SYNTHESIS OF OPTIMAL MOTIONS OF SEGMENTS IN THE SPACE AND ON THE PLANE . . . . . 73

    §1. Geometric Properties of Extremals . . . . . 74

    §2. Optimal Motion of Segments in the Space  $E^3$  . . . . . 79

    §3. Atlas of Optimal Motions of Segments on the Plane . . . . . 83

Appendix. THE MAXIMUM PRINCIPLE IN OPTIMAL CONTROL PROBLEMS WITH REGULAR CONSTRAINTS . . . . . 105

BIBLIOGRAPHY . . . . . 111

INDEX . . . . . 113
