

# Table of Contents

<b>1.</b>	<b>Introduction</b>	<b>1</b>
1.1	Homeostasis	5
1.2	Positive Feedback	7
1.3	Ecological Systems with Positive Feedback	8
1.4	Generalization 1: Increasing Complexity	10
1.5	Generalization 2: Accelerating Change	11
1.6	Generalization 3: Threshold Effects	11
1.7	Generalization 4: Fragility of Complex Systems	12
1.8	Summary and Conclusions	14
<b>2.</b>	<b>The Mathematics of Positive Feedback</b>	<b>15</b>
2.1	Graphical Analysis of a Simple Dynamic Positive Feedback System	15
2.2	A System of Two Mutualists	16
2.3	A System of Two Competitors	20
2.4	Mathematical Analysis of Positive Feedback	21
2.5	Summary and Conclusions	25
<b>3.</b>	<b>Physical Systems</b>	<b>27</b>
3.1	The Life History of a Star	27
3.2	Geophysical Systems	28
3.3	Autocatalysis in Chemical Systems	34
3.4	Summary and Conclusions	37
<b>4.</b>	<b>Evolutionary Processes</b>	<b>39</b>
4.1	Early Evolution of Life	39
4.2	Evolution at the Species Level	43
4.3	Coevolution	47
4.4	Summary and Conclusions	49

<b>5.</b>	<b>Organisms Physiology and Behaviour</b>	<b>51</b>
5.1	Destructive Positive Feedback	52
5.2	Biochemical Processes in Cells and Organisms	53
5.3	Feeding and Drinking Behavior	55
5.4	Sleep	56
5.5	Movement and Motor-Sensory Relationships	56
5.6	Mind-Body Relationship	58
5.7	Summary and Conclusions	59
<b>6.</b>	<b>Resource Utilization by Organisms</b>	<b>61</b>
6.1	Energy Allocation Tactics	62
6.2	Territorial Defense Strategies	64
6.3	Chemical Defense Strategies	68
6.4	Growth Rate Strategy	70
6.5	Summary and Conclusions	72
<b>7.</b>	<b>Social Behavior</b>	<b>75</b>
7.1	Evolution of r- and K-strategies	75
7.2	Development of Social Strategies	77
7.3	Mating and Reproduction	80
7.4	Population Models Incorporating Sexual Reproduction	83
7.5	Small Group Dynamics	86
7.6	Castes In Insect Societies	87
7.7	Dominance Within Groups	89
7.8	Models of Group Formation and Size	90
7.9	The Schooling of Fish	93
7.10	Social Interactions and Game Theory	95
7.11	Summary and Conclusions	98
<b>8.</b>	<b>Mutualistic and Competitive Systems</b>	<b>99</b>
8.1	Dynamics of Mutualistic Communities	103
8.2	Limits to Mutual Benefaction	107
8.3	Multi-Species Mutualism	111
8.4	Models of the Evolution of Mutualism	114
8.5	Isolation and Obligate Mutualism	118
8.6	Limited Competition	121
8.7	Summary and Conclusions	125

<b>9.</b>	<b>Age-Structured Populations</b>	127
9.1	Age Structure	127
9.2	Leslie Matrices	129
9.3	Compensatory Leslie Matrices	135
9.4	Interacting Populations	137
9.5	Coexistence of Two Interacting Populations	140
9.6	Other Compensatory Models	145
9.7	Life-History Strategies	148
9.8	Intrinsic Rate of Increase	149
9.9	Reproductive Strategies	150
9.10	Summary and Conclusions	154
<b>10.</b>	<b>Spatially Heterogeneous Systems: Islands and Patchy Regions</b>	157
10.1	Classical Theory of Island Biogeography	158
10.2	Island Clusters	162
10.3	Insular Reserves	163
10.4	Modeling the Patchy System	165
10.5	A Single Species in a Patchy Region	168
10.6	Time to Extinction on a Patch	170
10.7	Persistence of a Species in a Two-Patch Environment	171
10.8	Stability of a Single-Species, Two-Patch System	172
10.9	Persistence of a Species in an $N$ -Patch Environment	172
10.10	Multi-Species, Multi-patch Systems with Competition and Mutualism	174
10.11	Persistence of a Species in a Two-Species, Two-Patch Environment	176
10.12	Persistence of a Species in an $L$ -Species, $N$ -Patch Environment	177
10.13	Stability of a Two-Species, Two-Patch Model	177
10.14	Stability of an $L$ -Species, $N$ -Patch Model	178
10.15	Relationship Between Reserve Design and Species Persistence	180
10.16	Summary and Conclusions	186
<b>11.</b>	<b>Spatially Heterogeneous Ecosystems: Pattern Formation</b>	187
11.1	Spontaneous Emergence of Spatial Patterns	187
11.2	Diffusion Model	189
11.3	Pattern Formation Through Instability	192
11.4	Congregation of Colonial Organisms	194
11.5	Boundary Formation by Competition	196
11.6	Summary and Conclusions	199
<b>12.</b>	<b>Disease and Pest Outbreaks</b>	201
12.1	Physiological Effects in the Host Species	201
12.2	Mutualistic Interactions of more than one Pathogenic Agent	204

12.3	Models of a Directly Communicated Disease or Parasite . . . . .	205
12.4	Effects of Spatial Heterogeneity on Disease Outbreak Threshold Conditions . . . . .	209
12.5	Design of Immunization Programs . . . . .	213
12.6	Shape of the Contagion Rate Function . . . . .	214
12.7	Comparison with other Spatially Heterogeneous Models . . . . .	216
12.8	Host-Vector Models . . . . .	217
12.9	Summary and Conclusions . . . . .	219
<b>13.</b>	<b>The Ecosystem and Succession . . . . .</b>	<b>221</b>
13.1	The Ecosystem . . . . .	221
13.2	Succession as a Positive Feedback Process . . . . .	221
13.3	A Clementsian Model . . . . .	226
13.4	Markov Chain Models . . . . .	228
13.5	A Model of a Fire-Dependent System . . . . .	231
13.6	Positive Feedback Loops in Ecosystems . . . . .	233
13.7	Nutrient Cycling . . . . .	237
13.8	Selection on the Community or Ecosystem Level . . . . .	242
13.9	Summary and Conclusions . . . . .	244
<b>Appendices</b>	<b>. . . . .</b>	<b>247</b>
Appendix A:	Positive Linear Systems . . . . .	247
Appendix B:	Stability of Positive Feedback Systems . . . . .	248
Appendix C:	Stability of Discrete-Time Systems . . . . .	251
Appendix D:	Positive Equilibria and Stability . . . . .	252
Appendix E:	Comparative Statics of Positive Feedback Systems . . . . .	252
Appendix F:	Similarity Transforms . . . . .	254
Appendix G:	Bounds on the Roots of a Positive Linear System . . . . .	258
Appendix H:	Relationship Between Positive Linear System Stability Criteria and the Routh-Hurwitz Criteria . . . . .	259
<b>References</b>	<b>. . . . .</b>	<b>261</b>
