FOREWORD FROM THE PORTER LECTURES COMMITTEE	ix
PREFACE	xi
INTRODUCTION	3
1. <i>From Differentiable to Abstract Dynamics</i>	3
2. <i>What is a Dynamical System?</i>	4
3. <i>Some Nonclassical Dynamical Systems</i>	6
4. <i>The Classical Recurrence Theorems</i>	8
5. <i>Multiple Birkhoff Recurrence and van der Waerden's Theorem</i>	9
6. <i>Variations on van der Waerden's Theorem</i>	10
7. <i>Dynamical Reformulation</i>	13
8. <i>Note on Terminology</i>	15
PART I. RECURRENCE IN DYNAMICAL SYSTEMS	
CHAPTER 1 Recurrence and Uniform Recurrence in Compact Spaces	19
1. <i>Dynamical Systems and Recurrent Points</i>	19
2. <i>Automorphisms and Homomorphisms of Dynamical Systems, Factors, and Extensions</i>	20
3. <i>Recurrent Points for Bebutov Systems</i>	24
4. <i>Uniform Recurrence and Minimal Systems</i>	27
5. <i>Substitution Minimal Sets and Uniform Recurrence in Bebutov Systems</i>	31
6. <i>Combinatorial Applications</i>	34
7. <i>More Diophantine Approximation</i>	35
8. <i>Nonwandering Transformations and Recurrence</i>	38
CHAPTER 2 Van der Waerden's Theorem	40
1. <i>Bowen's Lemma and Homogeneous Sets</i>	41
2. <i>The Multiple Birkhoff Recurrence Theorem</i>	44
3. <i>The Multidimensional van der Waerden Theorem</i>	46
4. <i>Reformulations and Applications: Diophantine Inequalities</i>	47
5. <i>Further Refinements: IP-Sets</i>	51

## PART II. RECURRENCE IN MEASURE PRESERVING SYSTEMS

CHAPTER 3	Invariant Measures on Compact Spaces	59
	1. <i>Measure Preserving Systems and Poincaré Recurrence</i>	59
	2. <i>Invariant Measures on Compact Spaces</i>	61
	3. <i>Group Extensions, Unique Ergodicity, and Equidistribution</i>	66
	4. <i>Applications to Unitary Operators</i>	69
	5. <i>Invariant Measures for Symbolic Flows</i>	72
	6. <i>Density and Upper Density</i>	76
	7. <i>Szemerédi's Theorem</i>	76
	8. <i>Poincaré Sequences and Recurrence</i>	77
CHAPTER 4	Some Special Ergodic Theorems	79
	1. <i>Weakly Mixing Transformations</i>	79
	2. <i>Multiple Recurrence for Weakly Mixing Transformations</i>	83
	3. <i>Generic Measures and a Mean Ergodic Theorem</i>	88
	4. <i>Roth's Theorem</i>	90
	5. <i>More on Generic Measures</i>	95
	6. <i>Weak Mixing and Eigenfunctions</i>	96
CHAPTER 5	Measure Theoretic Preliminaries	98
	1. <i>Factors of Measure Spaces and Measure Preserving Systems</i>	98
	2. <i>Regular Measure Spaces</i>	103
	3. <i>Conditional Expectation</i>	104
	4. <i>Disintegration of Measures</i>	107
	5. <i>Relative Products of Measure Spaces</i>	110
	6. <i>Regular Homomorphisms</i>	115
CHAPTER 6	Structure of Measure Preserving Systems	117
	1. <i>Ergodic and Weak Mixing Extensions</i>	119
	2. <i>Some Examples of Compactness</i>	122
	3. <i>Characterizing Compact Extensions</i>	129
	4. <i>Existence of Compact Extensions</i>	136
	5. <i>Primitive Extensions and the Structure Theorem</i>	138
CHAPTER 7	The Multiple Recurrence Theorem	140
	1. <i>Limits of SZ-Systems</i>	140
	2. <i>Weak Mixing Extensions</i>	142
	3. <i>Primitive Extensions</i>	146
	4. <i>The Multiple Recurrence Theorem</i>	150

## PART III. DYNAMICS AND LARGE SETS OF INTEGERS

CHAPTER 8	Proximality in Dynamical Systems and the Theorems of Hindman and Rado	157
1.	<i>Proximality</i>	157
2.	<i>The Enveloping Semigroup and Idempotents</i>	158
3.	<i>Central Sets and Hindman's Theorem</i>	161
4.	<i>IP-Systems</i>	163
5.	<i>IP-Systems of Transformations and Birkhoff Recurrence</i>	166
6.	<i>A Basic Property of Central Sets</i>	169
7.	<i>Rado's Theorem</i>	172
CHAPTER 9	The Fine Structure of Recurrence and Mixing	175
1.	<i>Dual Families of Sets in <math>\mathbf{Z}</math></i>	176
2.	<i><math>\mathcal{S}</math>-Convergence and <math>\mathcal{S}</math>-Recurrence</i>	179
3.	<i>Algebras of Recurrent Functions on <math>\mathbf{Z}</math></i>	186
4.	<i>Mild Mixing</i>	189
5.	<i>Mild Mixing of All Orders</i>	192
BIBLIOGRAPHY		195
INDEX		201
