

Contents

CHAPTER I

A Brief Introduction to the Central Ideas of the Theory	1
§0. Introduction	1
§1. The Pitchfork Bifurcation	2
§2. The Continuous Flow Stirred Tank Reactor (CSTR)	16
§3. A First View of the Liapunov-Schmidt Reduction	25
§4. Asymptotic Stability and the Liapunov-Schmidt Reduction	35

APPENDIX 1

The Implicit Function Theorem	44
-------------------------------	----

APPENDIX 2

Equivalence and the Liapunov-Schmidt Reduction	47
--	----

CHAPTER II

The Recognition Problem	51
§0. Introduction	51
§1. Germs: A Preliminary Issue	54
§2. The Restricted Tangent Space	56
§3. Calculation of $RT(g)$, I: Simple Examples	58
§4. Principles for Calculating $RT(g)$, I: Basic Algebra	63
§5. Principles for Calculating $RT(g)$, II: Finite Determinacy	66
§6. Calculation of $RT(g)$, II: A Hard Example	77
§7. Principles for Calculating $RT(g)$, III: Intrinsic Ideals	81
§8. Formulation of the Main Results	86
§9. Solution of the Recognition Problem for Several Examples	93
§10. The Recognition Problem: General Equivalences	96
§11. Proof of Theorem 2.2	98
§12. Proof of Proposition 8.6(b)	102
§13. Proof of Theorem 8.7	107

CHAPTER III	
Unfolding Theory	117
§0. Introduction	117
§1. Unfoldings and Universal Unfoldings	120
§2. A Characterization of Universal Unfoldings	123
§3. Examples of Universal Unfoldings	129
§4. The Recognition Problem for Universal Unfoldings	133
§5. Nonpersistent Bifurcation Diagrams	140
§6. Statement of the Main Geometric Theorem	143
§7. A Simple Example: The Pitchfork	145
§8. A Complicated Example: The Winged Cusp	148
§9. A Sketch of the Proof of Theorem 6.1	152
§10. Persistence on a Bounded Domain in a Parametrized Family	154
§11. The Proof of Theorem 10.1	159
§12. The Path Formulation	165
CASE STUDY 1	
The CSTR	174
CHAPTER IV	
Classification by Codimension	182
§0. Introduction	182
§1. Philosophical Remarks Concerning Codimension	183
§2. The Classification Theorem	196
§3. Universal Unfoldings of the Elementary Bifurcations	202
§4. Transition Varieties and Persistent Diagrams	205
CHAPTER V	
An Example of Moduli	213
§0. Introduction	213
§1. The Problem of Moduli: Smooth Versus Topological Equivalence	214
§2. The Recognition Problem for Nondegenerate Cubics	216
§3. Universal Unfolding; Relation to Moduli	219
§4. Persistent Perturbed Diagrams	222
§5. A Picture of the Moduli Family	226
§6. Discussion of Moduli and Topological Codimension	236
§7. The Thermal-Chainbranching Model	239
CHAPTER VI	
Bifurcation with Z_2 -Symmetry	243
§0. Introduction	243
§1. A Simple Physical Example with Z_2 -Symmetry	244
§2. The Recognition Problem	247
§3. Universal Unfoldings	257
§4. Persistent Perturbations	260
§5. The Z_2 -Classification Theorem	263
§6. Persistent Perturbations of the Nonmodal Bifurcations	267
§7. The Unimodal Family of Codimension Three	272
§8. Perturbations at the Connector Points	280

CHAPTER VII	
The Liapunov–Schmidt Reduction	289
§0. Introduction	289
§1. The Liapunov–Schmidt Reduction Without Symmetry	290
§2. The Elastica: An Example in Infinite Dimensions	296
§3. The Liapunov–Schmidt Reduction with Symmetry	300
§4. The Liapunov–Schmidt Reduction of Scalar Reaction–Diffusion Equations	308
§5. The Brusselator	312
§6. The Liapunov–Schmidt Reduction of the Brusselator	317
APPENDIX 3	
Smooth Mappings Between Banach Spaces	329
APPENDIX 4	
Some Properties of Linear Elliptic Differential Operators	332
CHAPTER VIII	
The Hopf Bifurcation	337
§0. Introduction	337
§1. Simple Examples of Hopf Bifurcation	338
§2. Finding Periodic Solutions by a Liapunov–Schmidt Reduction	341
§3. Existence and Uniqueness of Solutions	350
§4. Exchange of Stability	358
§5. Degenerate Hopf Bifurcation	372
CASE STUDY 2	
The Clamped Hodgkin–Huxley Equations	382
CHAPTER IX	
Two Degrees of Freedom Without Symmetry	397
§0. Introduction	397
§1. Bifurcation with n State Variables	398
§2. Hilltop Bifurcation	400
§3. Persistent Bifurcation Diagrams for Hilltop Bifurcation	407
CHAPTER X	
Two Degrees of Freedom with $(\mathbf{Z}_2 \oplus \mathbf{Z}_2)$ -Symmetry	417
§0. Introduction	417
§1. Bifurcation Problems with $(\mathbf{Z}_2 \oplus \mathbf{Z}_2)$ -Symmetry	418
§2. Singularity Theory Results	421
§3. Linearized Stability and $(\mathbf{Z}_2 \oplus \mathbf{Z}_2)$ -Symmetry	426
§4. The Bifurcation Diagrams for Nondegenerate Problems	430
CASE STUDY 3	
Mode Jumping in the Buckling of a Rectangular Plate	439
Bibliography	455
Symbol Index	460
Index	461
