

CONTENTS

Introduction	vii
Chapter I. Laplace expansions, outer regions	1
1.1 Generalities, Notation	1
1.2 Saddle points and contours	9
1.3 Terms of the expansion, for the contour \tilde{C}	29
1.4 Error control, for the contour \tilde{C}	35
1.5 Asymptotic behavior of $V(k)$ as $k \rightarrow \infty$	44
1.6 Terms of the expansion, for the contour C_j	56
1.7 Error control, for the contour C_j	65
Chapter II. Expansion in the inner region, Matching	75
2.1 Expansion and the error term	75
2.2 Error control, for the contour \tilde{C}	82
2.3 Error control, for the contour C_j	86
2.4 Matching	91
Chapter III. Uniformly Valid Expansions as $t \rightarrow \infty$	96
3.1 The contours C_j , C_{-j}^+ and C_K^+	96
3.2 The Uniform Expansion of $I(x, t)$	107
Chapter IV. Special Results for Special Cases	114
4.1 The Case $r = 2$	114
4.2 Large x asymptotics when $r = 2$	120
4.3 The Linear Schrödinger Equation	123
4.4 The Linearized Benjamin-Ono Equation	127
4.5 The Case $r = 3$	135
4.6 The Linearized Korteweg-de Vries Equation	147
Chapter V. Applications	155
5.1 Self-Similar Asymptotic Approximations	155
5.2 Sharp L^s decay estimates, Smoothing Effects	160
5.3 Asymptotic Balance as $t \rightarrow \infty$	169
5.4 Asymptotic Behavior as $ x \rightarrow \infty$	186
References	194
Subject Index	198
