General Introduction	3
1	7
1.0 Introduction	7
1.1 The Lagrangian Picture	8
1.2 The Hamiltonian Picture	19
1.3 Examples	28
2	51
2.0 Introduction	51
2.1 The Canonical and Symplectic Forms	57
2.2 Symplectic Transformations	62
2.3 The Equations of Variation	79
2.4 The Circulation Theorem	84
2.5 The Euler System	87
2.6 Irrotational Solutions	96
2.7 The Equation of Continuity	99
3	105
3.0 Introduction	105
3.1 Compatible Currents	108
3.2 Null Currents and Null Lagrangians	125
3.3 The Source Equations	128
3.4 The Generic Case $n > 1$ & $m > 2$	133
3.5 The Separable Case $m > 2$	141
3.6 The Case $m = 2$	144
3.7 Lie Flows and the Noether Current	146
4	159
4.1 Sections of Vector Bundles	159

5		191
5.0	Introduction	191
5.1	Relative Lagrangians	195
5.2	Ellipticity and Hyperbolicity	220
5.3	The Domain of Dependence	240
6		263
6.1	The Electromagnetic Field	263
6.2	Electromagnetic Symplectic Structure	272
6.3	Electromagnetic Compatible Currents	282
6.4	Causality in Electromagnetic Theory	299
	Bibliography	315
	Index	317
