Introduction

vii

Chapter 1 A Survey of Optimization Problems with Vector Criteria

1.1	General Survey of the Problem	1
1.2	The Remarks of L. A. Zadeh	10
1.3	Optimization of an Ordered Set of Scalar Criteria	11
1.4	Hierarchical Ranking of Scalar Criteria	17
1.5	Unimprovable Solutions in the Problem of Vector Optimization (Pareto Optimality)	19
1.6	The Work of A. Salamma and V. Gourishankar	23
1.7	Solutions in Fuzzy Neighborhoods	25

Chapter 2 The Formulation of Optimization Problems with Vector Functionals

2.1	The General Mathematical Formulation of the Problem	29
2.2	A Statement of Optimal Trajectory Programming Problems with a Vector-Valued Criterion	30
2.3	Flight at a Prescribed Altitude	36
2.4	Analytic Construction of Optimal Regulators	49

Chapter 3 The Existence of Solutions in Optimization Problems with Vector-Valued Criteria

3.1	Formulation of the Existence Problem	52
3.2	The Maximum Principle for the Problem of Mayer with a Scalar Functional	55
3.3	The Maximum Principle for Vector Optimization Problems	57
3.4	The Flight of a Pilotless Aircraft	60
3.5	On Sufficient Conditions for Problems of Scalar Optimization	68
3.6	On Sufficient Conditions for Problems of Vector Optimization	69

Chapter 4 Programming Optimal Trajectories for Problems with Vector-Valued Criteria

4.1	Introduction	71
4.2	A General Approach to the Solution of Programming Problems	72
4.3	A Simple Second-Order Example	77
4.4	On the Problem of Optimal Flight to a Given Location	93
4.5	Vertical Flight of a Rocket in a Vacuum	102

Chapter 5 A. Letov's Problem. The Analytic Construction of Optimal Regulators for Problems with Vector-Valued Criteria

5.1	The Problem of Analytic Construction	113
5.2	The Solution of the General ACOR Problem for Vector Functionals by Dynamic Programming	114
5.3	An Example	122
5.4	Vector Functionals in Linear ACOR Problems	132
5.5	An Example	141

Chapter 6 The Optimization of Vector Functionals in Linear (Nonlinear) Programming Problems

6.1	The Linear Programming Problem	149
6.2	The General Programming Problem	151
6.3	A More General Problem	151
6.4	Ordered Sets in Programming Problems	152
6.5	A Different Statement of the Linear (Nonlinear) Programming Problem for Vector Criteria	154
6.6	Determination of the Vector-Optimal Plan	157
6.7	Compromise Solutions	158
6.8	The Existence of a Vector-Optimal Plan	163
6.9	A Numerical Example of the Determination of a Vector-Optimal Plan	163
6.10	A Planning Problem in the Metallurgical Industry	168

Chapter 7 Parameter Optimization in Engineering Systems

7.1	Problem Statement	182
7.2	The Problem of Parameter Optimization for Heat Exchange in a Nuclear Power Station	187
7.3	The Parameter Optimization Problem for the Condenser of the BRGD-1000	189
7.4	A Search Algorithm	203
