Preface to the Second Edition	<i>page</i> xi
Acknowledgements	xiii
The International Phonetic Alphabet	xiv
<b>PART ONE THE NATURE OF LANGUAGE</b>	<b>1</b>
<b>Chapter 1 Are Humans Unique?</b>	<b>3</b>
1.1 On origins	3
1.2 Rules and creativity	4
1.3 Animal communication and the 'design features' of language	6
1.4 Genetic transmission of language	11
1.5 Human-like language in higher primates?	14
1.6 The functional significance of Hockett's design features	21
1.7 Structure and function in language	23
1.8 Saussure's structuralist linguistics	25
Exercises	27
Bibliography	30
<b>Chapter 2 The Data of Linguistics and the Nature of Learning</b>	<b>32</b>
2.1 Structuralist linguistics and behaviourist psychology	32
2.2 Objections to a corpus-based approach	35
2.3 Rules and intuitions – mentalist linguistics	38
2.4 Objections to mentalist linguistics	42
2.5 Native language learning; empiricism v. rationalism	44
2.6 External evidence for language innateness	47
2.7 An internal argument for innateness	49
Exercises	53
Bibliography	55
<b>PART TWO THE STRUCTURE OF LANGUAGE</b>	<b>57</b>
<b>Chapter 3 Phonetics</b>	<b>59</b>
3.1 Primacy of spoken language	59
3.2 Sound waves	60
3.3 Air vibration	66
3.4 Voice production	68
3.5 Respiration and speech airstream mechanism	70

3.6	Analysis and classification of vowels	71
3.7	Liquids and fricatives	77
3.8	Places of articulation	79
3.9	Stops and affricates	81
3.10	Voicing and nasalisation	83
3.11	Suprasegmentals	86
	Exercises	89
	Bibliography	91
<b>Chapter 4</b>	<b>Phonology</b>	93
4.1	Physical sound and linguistic sound	93
4.2	Contextual variation of sound	94
4.3	Criteria of analysis	95
4.4	Daniel Jones and the phoneme	97
4.5	Sapir's psychological approach	99
4.6	Discovery procedures	102
4.7	Classification of phonemes	105
4.8	Distinctive features	109
4.9	Rules and formalism	117
	Exercises	123
	Bibliography	126
<b>Chapter 5</b>	<b>Morphology</b>	128
5.1	The morpheme as the basic unit	128
5.2	Phonologically conditioned morphological variation	129
5.3	Boundaries between morphemes – the morph	132
5.4	The word – definitional criteria	134
5.5	Morphological classification of languages	139
5.6	The priority question – words v. morphemes	142
5.7	Lexical productivity – the creation of words	144
5.8	Approaches to morphological description	149
	Exercises	152
	Bibliography	153
<b>Chapter 6</b>	<b>Syntax</b>	155
6.1	The domain of syntax	155
6.2	Representing constituency: phrase structure grammar	160
6.3	Justifying constituency: empirical diagnostics	170
6.4	Subcategorisation restrictions	174
6.5	Transformations	178
	Exercises	184
	Bibliography	187
<b>Chapter 7</b>	<b>Semantics</b>	188
7.1	Word-meaning and sentence-meaning	188
7.2	Semantic properties and relations of words	190

7.3	Semantic properties and relations of sentences	197
7.4	Theories of word-meaning	199
7.5	Theories of sentence-meaning	208
7.6	Semantics and pragmatics	216
	Exercises	219
	Bibliography	222
<b>Chapter 8</b>	<b>Rules and Principles in the Theory of Grammar</b>	<b>224</b>
8.1	Restricting the base	224
8.2	Constraining transformational rules	230
8.3	Abstract principles in syntax	239
8.4	Generative phonology	248
8.5	Autosegmental representations	254
8.6	Template-based morphology	260
8.7	Metrical structures	264
8.8	Stress in syntax	270
	Exercises	277
	Bibliography	284
<b>PART THREE</b>	<b>THE USE OF LANGUAGE</b>	<b>287</b>
<b>Chapter 9</b>	<b>Psycholinguistics</b>	<b>289</b>
9.1	Linguistics, psycholinguistics and cognitive psychology	289
9.2	Psychological reality of distinctive features	290
9.3	Psychological reality of constituent-structure	293
9.4	Psychological reality of deep structures	297
9.5	Psychological reality of transformational rules	300
9.6	Against the psychological reality of transformational rules	303
9.7	An alternative to the Derivational Theory of Complexity	306
9.8	Semantics and sentence memory	310
9.9	The psychological lexicon	314
9.10	Universal categories of thought	317
	Exercises	320
	Bibliography	323
<b>Chapter 10</b>	<b>Language Development in Children</b>	<b>326</b>
10.1	Description and explanation in language acquisition research	326
10.2	Phonological development	329
10.3	Early syntactic development	336
10.4	Transformational rules in language development	339
10.5	Semantic development: relational meanings	341
10.6	Semantic development: referential meanings	346

10.7 The development of speech-acts	349
10.8 Linguistic environment and language learning	352
Exercises	355
Bibliography	358
<b>Chapter 11 Comparative Linguistics</b>	360
11.1 The problem of 'language'	360
11.2 Types of similarity and their significance	361
11.3 Universals and typology of language	363
11.4 The nature of language change	367
11.5 Change and reconstruction	372
11.6 Linguistic geography	378
11.7 Mechanisms of linguistic change	382
Exercises	384
Bibliography	386
<b>Chapter 12 Sociolinguistics</b>	388
12.1 Language and socialisation	388
12.2 Language varieties	390
12.3 Class, codes and control	392
12.4 Variable rules	397
12.5 Social variables	399
12.6 Register	404
12.7 Community grammars	407
12.8 Pidgins and creoles	410
12.9 Conclusion	413
Exercises	415
Bibliography	418
Addenda to Bibliographies	422
Author Index	427
Subject Index	429
