

# C O N T E N T S

INTRODUCTION	v
§0 - NOTATIONS	
I - THE INTERIOR INTEGRAL	7
§1. <i>The Riemann-Stieltjes integral and the interior integral</i>	7
§2. <i>The Riemann integral and the Darboux integral</i>	12
§3. <i>Regulated functions</i>	16
§4. <i>Functions of bounded B-variation</i>	21
§5. <i>Representation theorems and the theorem of Helly</i>	38
§6. <i>Representation theorems on open intervals</i>	53
II- THE ANALYSIS OF REGULATED FUNCTIONS	69
§1. <i>The theorem of Bray and the formula of Dirichlet</i>	69
§2. <i>Extension to open intervals</i>	79
III- VOLTERRA STIELTJES-INTEGRAL EQUATIONS WITH LINEAR CONSTRAINTS	82
§1. <i>The resolvent of a Volterra Stieltjes-integral equation</i>	85
§2. <i>Integro-differential equations and harmonic operators</i>	116
§3. <i>Equations with linear constraints</i>	124
