

# TABLE OF CONTENTS

## CHAPTER 1

Necessary Conditions for Optimality in Problems with  
Nonstandard Cost Functionals

1. INTRODUCTION . . . . .	1
2. PRELIMINARIES . . . . .	1
3. NECESSARY CONDITIONS FOR OPTIMALITY . . . . .	5
4. COST FUNCTIONAL OF THE FORM OF A PRODUCT . . . . .	10
5. CERTAIN GENERALIZATIONS . . . . .	10
REFERENCES . . . . .	10

## CHAPTER 2

Linear Control Problems and an Existence Theorem

1. INTRODUCTION . . . . .	14
2. AN EXISTENCE THEOREM . . . . .	14
3. NECESSARY CONDITIONS FOR OPTIMALITY . . . . .	17
REFERENCES . . . . .	23

## CHAPTER 3

Optimal Disturbance Rejection and Performance Robustness  
in Linear Systems

ABSTRACT . . . . .	25
1. INTRODUCTION . . . . .	25
2. PROBLEM FORMULATION . . . . .	28
3. EXISTENCE OF THE WORST EXOGENOUS INPUT . . . . .	29

4. EVALUATION OF $\lambda$ . . . . .	31
5. SOME APPLICATIONS . . . . .	37
6. PERFORMANCE ROBUSTNESS . . . . .	40
7. NAVION WING LEVELER SYSTEM . . . . .	43
8. CONCLUSIONS . . . . .	47
REFERENCES . . . . .	48

## CHAPTER 4

### Necessary Conditions for Optimal Disturbance Rejection

#### in Linear Systems

ABSTRACT . . . . .	49
1. INTRODUCTION . . . . .	49
2. NECESSARY CONDITIONS FOR A FIXED $C(t)$ . . . . .	52
3. A NECESSARY CONDITION FOR THE MAXIMIZATION OF $\lambda$ . . . . .	54
4. PROBLEM FORMULATION FOR AN OBSERVER-BASED CONTROLLER . . . . .	57
5. NECESSARY CONDITIONS FOR A FIXED $C(t)$ IN THE CASE OF AN OBSERVER-BASED CONTROLLER . . . . .	58
6. MAXIMIZATION OF $\lambda$ IN THE CASE OF AN OBSERVER-BASED CONTROLLER . . . . .	59
7. REDUCED ORDER OBSERVER CASE . . . . .	62
8. SUFFICIENCY THEORY . . . . .	65
9. AN EXAMPLE . . . . .	66
10. CONCLUSIONS . . . . .	67
REFERENCES . . . . .	68

**CHAPTER 5**Synthesis of Finite-Interval  $H_\infty$  Controllers by

## State Space Methods

ABSTRACT . . . . .	70
1. INTRODUCTION . . . . .	70
2. STATE SPACE FORMULATION OF THE $H_\infty$ PROBLEM . . . . .	72
3. OPTIMALITY CONDITIONS . . . . .	76
4. OPTIMALITY CONDITIONS FOR THE MAXIMIZATION OF $\lambda$ . . . . .	79
5. A NUMERICAL EXAMPLE . . . . .	81
6. CONCLUSIONS . . . . .	84
REFERENCES . . . . .	84

**CHAPTER 6**

## Worst-Case Performance Measures for

## Linear Control Problems

ABSTRACT . . . . .	88
1. INTRODUCTION . . . . .	88
2. EXISTENCE OF THE WORST EXOGENOUS INPUT . . . . .	91
3. CHARACTERIZATION OF THE OPTIMAL VALUE . . . . .	94
4. ROBUSTNESS CONSIDERATIONS . . . . .	98
5. VARIATION OF PERFORMANCE WITH CONTROL PARAMETERS . . . . .	102
6. CONCLUSIONS . . . . .	103
REFERENCES . . . . .	103

**CHAPTER 7****Model Reduction with a Finite-Interval** **$H_\infty$  Criterion**

ABSTRACT . . . . .	105
1. INTRODUCTION . . . . .	105
2. COMPUTATION OF $\lambda$ FOR A GIVEN REDUCED ORDER MODEL . . . . .	109
3. ROBUST MODEL REDUCTION . . . . .	112
4. NUMERICAL EXAMPLES . . . . .	116
5. CONCLUSIONS . . . . .	122
REFERENCES . . . . .	123
SUBJECT INDEX . . . . .	129
