

Contents

<i>Preface</i>	xi
Chapter 1 Structured Systems	1
1.1 Graphs and Dynamic Systems	2
1.2 Input and Output Reachability	6
1.3 Partitions and Condensations	12
1.4 Structural Controllability and Observability	20
1.5 Plant and Feedback Structures	31
1.6 Structurally Fixed Modes	40
1.7 Notes and References	58
Bibliography	61
Chapter 2 Stabilization	65
2.1 Connective Stability	66
2.2 Vector Liapunov Functions	71
2.3 Stabilization	86
2.4 Connective Stabilizability	92
2.5 Graph-Theoretic Algorithm	103
2.6 Notes and References	113
Bibliography	118
Chapter 3 Optimization	126
3.1 Suboptimality	127

3.2	Complex Systems	136
3.3	Robustness of Suboptimal Control	144
3.4	Optimality and Robustness	155
3.5	Decentrally Optimal Systems	165
3.6	Notes and References	180
	Bibliography	182
Chapter 4 Estimation and Control		186
4.1	An Interconnected Observer	187
4.2	Decentralized Feedback	192
4.3	Separation Property	199
4.4	Decentralized Observer	201
4.5	Stochastic Control	208
4.6	Estimation	216
4.7	Incomplete State Information	219
4.8	Structural Perturbations	222
4.9	Degenerate Control	226
4.10	Notes and References	232
	Bibliography	234
Chapter 5 Output Control		237
5.1	Dynamic Output Feedback	238
5.2	Structured Almost Invariant Subspaces	247
5.3	Graph-Theoretic Characterization	253
5.4	Decentral Stabilizability	267
5.5	Adaptive Control	272
5.6	Known Subsystems	290
5.7	Adaptive Output Feedback	295
5.8	Notes and References	302
	Bibliography	307
Chapter 6 Hierarchical LBT Decompositions		311
6.1	Input Decompositions	312
6.2	Stabilization	320
6.3	Input-Output Decompositions	329
6.4	Sequential Optimization	348
6.5	Notes and References	371
	Bibliography	372
Chapter 7 Nested Epsilon Decompositions		374
7.1	Epsilon Decomposability	375

7.2	Decomposition Algorithm	378
7.3	Control Applications	382
7.4	Nested Connective Stability	389
7.5	Block Diagonal Dominance	399
7.6	Notes and References	405
	Bibliography	411
 Chapter 8 Overlapping Decompositions		 414
8.1	Preliminaries	415
8.2	The Inclusion Principle	424
8.3	Optimization	437
8.4	Nonlinear Systems	452
8.5	Notes and References	463
	Bibliography	467
 Chapter 9 Reliable Control		 472
9.1	Multiple Control Systems	473
9.2	Reliability of Control Structures	483
9.3	Design of Reliable Control	486
9.4	Maintained Control Systems	496
9.5	Notes and References	503
	Bibliography	504
 Appendix Graph-Theoretic Algorithms		 507
 <i>Index</i>		 521
