

# Contents

<b>Preface</b> .....	xi
<b>Notation and Terminology</b> .....	xiv
<b>Chapter 1. Elementary Theory of Holomorphic Functions</b> .....	1
1. Some basic properties of $\mathbb{C}$ -differentiable and holomorphic functions	2
2. Integration along curves .....	9
3. Fundamental properties of holomorphic functions .....	21
4. The theorems of Weierstrass and Montel .....	32
5. Meromorphic functions .....	36
6. The Looman-Menchoff theorem .....	43
<b>Notes on Chapter 1</b> .....	50
<b>References: Chapter 1</b> .....	51
<b>Chapter 2. Covering Spaces and the Monodromy Theorem</b> .....	53
1. Covering spaces and the lifting of curves .....	53
2. The sheaf of germs of holomorphic functions .....	55
3. Covering spaces and integration along curves .....	58
4. The monodromy theorem and the homotopy form of Cauchy's theorem .....	60
5. Applications of the monodromy theorem .....	64
<b>Notes on Chapter 2</b> .....	69
<b>References: Chapter 2</b> .....	69

<b>Chapter 3. The Winding Number and the Residue Theorem</b> .....	70
1. The winding number .....	70
2. The residue theorem .....	75
3. Applications of the residue theorem .....	81
<b>Notes on Chapter 3</b> .....	87
<b>References: Chapter 3</b> .....	87
<b>Chapter 4. Picard's Theorem</b> .....	89
<b>Notes on Chapter 4</b> .....	97
<b>References: Chapter 4</b> .....	98
<b>Chapter 5. The Inhomogeneous Cauchy-Riemann Equation and Runge's Theorem</b> .....	100
1. Partitions of unity .....	100
2. The equation $\frac{\partial u}{\partial \bar{z}} = \phi$ .....	102
3. Runge's theorem .....	106
4. The homology form of Cauchy's theorem .....	115
<b>Notes on Chapter 5</b> .....	117
<b>References: Chapter 5</b> .....	118
<b>Chapter 6. Applications of Runge's Theorem</b> .....	119
1. The Mittag-Leffler theorem .....	119
2. The cohomology form of Cauchy's theorem .....	123
3. The theorem of Weierstrass .....	126
4. Ideals in $\mathcal{H}(\Omega)$ .....	131
<b>Notes on Chapter 6</b> .....	141
<b>References: Chapter 6</b> .....	142
<b>Chapter 7. The Riemann Mapping Theorem and Simple Connectedness in the Plane</b> .....	144
1. Analytic automorphisms of the disc and of the annulus .....	144
2. The Riemann mapping theorem .....	148
3. Simply connected plane domains .....	150
<b>Notes on Chapter 7</b> .....	153
<b>References: Chapter 7</b> .....	154

<b>Chapter 8. Functions of Several Complex Variables</b> .....	156
<b>Notes on Chapter 8</b> .....	164
<b>References: Chapter 8</b> .....	165
<b>Chapter 9. Compact Riemann Surfaces</b> .....	166
1. Definitions and basic theorems .....	166
2. Meromorphic functions .....	171
3. The cohomology group $H^1(\mathfrak{U}, \mathcal{O})$ .....	173
4. A theorem from functional analysis .....	176
5. The finiteness theorem .....	183
6. Meromorphic functions on a compact Riemann surface .....	185
<b>Notes on Chapter 9</b> .....	190
<b>References: Chapter 9</b> .....	191
<b>Chapter 10. The Corona Theorem</b> .....	193
1. The Poisson Integral and the theorem of F. and M. Riesz .....	194
2. The corona theorem .....	204
<b>Notes on Chapter 10</b> .....	214
<b>References: Chapter 10</b> .....	215
<b>Chapter 11. Subharmonic Functions and the Dirichlet Problem</b> .....	216
1. Semi-continuous functions .....	216
2. Harmonic functions and Harnack's principle .....	219
3. Convex functions .....	223
4. Subharmonic functions: Definition and basic properties .....	227
5. Subharmonic functions: Further properties and application to convexity theorems .....	236
6. Harmonic and subharmonic functions on Riemann surfaces .....	246
7. The Dirichlet problem .....	246
8. The Radó-Cartan theorem .....	255
<b>Notes on Chapter 11</b> .....	260
<b>References: Chapter 11</b> .....	261
<b>Appendix</b> .....	263
<b>Subject Index</b> .....	264
