

Table of Contents

Preface	ix
Contents of Volume 1	x
1. Introduction	1
1.1. Organization and References	1
1.2. Errata for Volume 1	1
1.3. Notations, Definitions and Theorems	3
2. Evaluation of Residues	6
3. Applications of Calculus of Residues in the Theory of Functions	18
3.1. A Generalization of the Principle of the Argument	18
3.2. Runge's Phenomenon	19
3.3. Expansion into Bürmann's Series	22
3.4. Carleman's Theorem	23
3.5. Analytic Continuation of Cauchy Type Integrals	26
3.6. An Asymptotic Formula	26
3.7. Miscellaneous Applications	29
4. Evaluation of Real Definite Integrals by Means of Residues	36
4.1. Integrals with Infinite Limits	36
4.2. Integrals with Finite Limits	47
4.3. Čebyšev's Approximation of the Integral of a Positive Function	64
4.4. A Note on some Papers of Ostrogradski and Bouniakowski	67
5. Evaluation of Finite and Infinite Sums by Residues	69
5.1. Gauss' Sums	69
5.2. The Riemann Zeta Function	72
5.3. Miscellaneous Summations	74

6.	Applications of Calculus of Residues to Special Functions	80
6.1.	Polygamma Functions of Arbitrary Order	80
6.2.	A Connection Between the Exponential and the Gamma Function	82
6.3.	Residues of Some Functions Related to the Gamma Function	84
6.4.	Some Integrals Involving the Gamma Function	87
7.	Master's dissertation of J. V. Sohocki	93
7.1.	Introduction	93
7.2.	Properties of Residues	95
7.3.	Two Formulas of Lagrange	100
7.4.	Continued Fractions	101
7.5.	Legendre's Polynomials	103
7.6.	Expansion of a Function by Means of Continued Fractions	108
8.	On the Principal and the Generalized Value of Improper Integrals (DRAGAN S. DIMITROVSKI)	110
8.1.	Substitution in Complex Integrals	110
8.2.	The Principal Value for Higher Order Poles	112
8.3.	The Principal Value in the Case when the Limits of Integration are Singular Points	114
8.4.	Generalized Value of an Improper Integral with Infinite Limits	117
8.5.	Generalized Value of an Improper Integral Between Finite Limits	128
9.	Applications of the Calculus of Residues to Numerical Evaluation of Integrals (DOBRILO Đ. TOŠIĆ)	133
10.	Inclusive Calculus of Residues (MIODRAG S. PETKOVIĆ)	140
11.	Complex Polynomials Orthogonal on the Semicircle (GRADIMIR V. MILOVANOVIĆ)	147
11.1.	Introduction	147
11.2.	Orthogonality on the Semicircle	149
11.3.	Existence and Representation of π_n	150
11.4.	Recurrence Relation	155
11.5.	Jacobi Weight	156
11.6.	Symmetric Weights and Gegenbauer Weights	157
11.7.	The zeros of $\pi_n(z)$	159
12.	A Representation of Half Plane Meromorphic Functions (DRAGIŠA MITROVIĆ)	162

13. Calculus of Residues and Distributions (DRAGIŠA MITROVIĆ)	167
13.1. Test Functions and Distributions	167
13.2. The Spaces D and D'	167
13.3. The Spaces E and E'	170
13.4. The Spaces \mathcal{O}_a and \mathcal{O}'_a	171
13.5. A Distributional Representation of Half Plane Meromorphic Functions	173
13.6. A Generalization of the Residue Theorem	176
13.7. A Generalization of the Cauchy Integral Theorem for an Infinite Strip	180
 Name Index	 187
 Subject Index	 190
