

TABLE OF CONTENTS

I. FOUNDATIONS. LINEAR FUNCTIONS

	Page
TRANSLATOR'S PREFACE	iii
§ 1. Analytic Functions and Conformal Mapping.....	1
§ 2. Integral Linear Functions	13
§ 3. The Function $w = 1/z$	15
Appendix to § 3: Stereographic Projection.....	21
§ 4. Linear Functions	23
§ 5. Linear Functions (continued)	33
§ 6. Groups of Linear Functions	43

II. RATIONAL FUNCTIONS

§ 7. $w = z^n$	51
§ 8. Rational Functions	62

III. GENERAL CONSIDERATIONS

§ 9. The Relation Between the Conformal Mapping of the Boundary and that of the Interior of a Region.	71
§ 10. Schwarz' Principle of Reflection	73

IV. FURTHER STUDY OF MAPPINGS REPRESENTED BY GIVEN FORMULAS

§ 11. Further Study of the Geometry of $w = z^2$	79
§ 12. $w = z + 1/z$	84
§ 13. The Exponential Function and the Trigonometric Functions	92
§ 14. The Elliptic Integral of the First Kind.....	95

V. MAPPINGS OF GIVEN REGIONS

	Page
§ 15. The Mapping of a Given Region onto the Interior of a Circle (Illustrative Examples)	109
§ 16. Vitali's Theorem on Double Series	119
§ 17. A Limit Theorem for Simple Mappings	125
§ 18. Proof of Riemann's Mapping Theorem	128
§ 19. On the Actual Construction of the Conformal Mapping of a Given Region Onto a Circular Disc	131
§ 20. Potential-Theoretic Considerations	137
§ 21. The Correspondence Between the Boundaries under Conformal Mapping	152
§ 22. Distortion Theorems for Simple Mappings of the Disc $ z < 1$	156
§ 23. Distortion Theorems for Simple Mappings of $ z > 1$	168
§ 24. On the Conformal Mapping of Non-Simple, Simply-Connected Regions Onto a Circular Disc	186
Remark on the Mapping of Non-Simple, Multiply-Connected Regions Onto Simple Regions	193
§ 25. The Problems of Uniformization	194
§ 26. The Mapping of Multiply-Connected Plane Regions Onto Canonical Regions	209
BIBLIOGRAPHY	230
INDEX	231
