CONTENTS

Volume I

PREFACE vii

CHAPTER 1. THE INITIAL CONDITIONS, A REVIEW OF SOME FACTS 1

1. Algebra and Trigonometry 1
2. Some Inequalities 4
3. Differentiation 5
4. Integration 7
5. Some Geometric Function Theory 10

CHAPTER 2. THE DEFINITION AND ELEMENTARY PROPERTIES OF UNIVALENT FUNCTION 12

1. Some Definitions and Examples 12
2. Some Operations in the Set of Univalent Functions 17

Problems 20

CHAPTER 3. SOME AREA THEOREMS 25
Problems 30

CHAPTER 4. ELEMENTARY BOUNDS FOR THE COEFFICIENTS 33
1. The Second Coefficient in the Set S 33
2. Some Other Coefficient Bounds 35
3. Bounded Univalent Functions 36
4. Univalent Functions That Have a Pole 40
★ 5. Does a Problem Have a Solution 41
Problems 45

CHAPTER 5. SOME THEOREMS ON POWER SERIES 49
1. Coefficients For the Area Theorem 49
2. Coefficients For the Inverse of a Function 54
3. Transformation of the Range From the Unit Disk to the Right Half-Plane 58
Problems 60

CHAPTER 6. IMPLICATIONS OF THE BOUND ON THE SECOND COEFFICIENT 62
1. Distortion Theorems 62
2. The Argument of the Derivative of a Univalent Function 66
3. The Modulus of a Univalent Function 67
4. A Robertson Conjecture 72
Problems 73

CHAPTER 7. FUNCTIONS WITH POSITIVE REAL PART 77
1. Elementary Properties of the Set P 77

2. The Coefficient Bounds 80
3. The Techinque of Dominant Power Series 81
4. Subordination and The Lindelöf Principle 84
5. The Noshiro-Warschawski Theorem 88
6. Divided Differences and p-Valent Functions 89
7. Extreme Points and the Krein-Mil'man Theorem 93
8. The Herglotz Representation Formula 96
Problems 100

CHAPTER 8. CONVEX AND STARLIKE FUNCTIONS 107
1. Definitions 107
2. Convexity and Starlikeness on a Curve 108
3. Functions Univalent in the Unit Disk 111
4. Ford's Theorem 112
5. Alexander's Theorem 114
6. Sharp Bounds for the Coefficients 115
7. Two Radius Problems 119
8. Integral Representations 121
9. The Schwarz-Christoffel Transformation 123
10. Another Look at The Herglotz Formula 126
Problems 128

CHAPTER 9. MORE ABOUT STARLIKE AND CONVEX FUNCTIONS 137
1. Convex and Starlike Functions of Order Alpha 137
2. Alpha-Convex Functions 142
3. Alpha-Spiral Functions 148
4. Other Centers for a Starlike Function 155

5. Further Generalizations of a Starlike Domain 166
6. Functions That are Starlike with Respect to a Boundary Point 169
Problems 171

CHAPTER 10. TYPICALLY-REAL FUNCTIONS AND RELATED TOPICS 181

1. Univalent Functions with Real Coefficients 181
2. Typically-Real Functions 184
3. The Region of Values at a Point 188
4. Functions that are Convex In One Direction 193
5. Functions that are Starlike In One Direction 207
6. Functions with Positive Real Part and Real Coefficients 211
Problems 211
