Preface	vii
Chapter 1. L^2 -Cohomology, Exhaustions with Finite Charge and Theta Series	1
Introduction	1
1. Square Integrable One Forms	3
2. Exhaustion Functions with Finite Charge	16
3. Parabolic Surfaces	25
4. Theta Functions	42
A. Summary of Results from Chapter 1	57
Chapter 2. The Torelli Theorem	63
Introduction	63
5. Geometric Hypotheses	66
6. Pointwise Bounds on Differential Forms	79
7. Zeroes of the Theta Function	110
8. Riemann's Vanishing Theorem	124
9. The Geometry of the Theta Divisor	134
10. Hyperelliptic Theta Divisors	152
11. The Torelli Theorem	162
Chapter 3. Examples	169
Introduction	169
12. Hyperelliptic Surfaces	172
13. Heat Curves: Basic Properties	180
14. Heat Curves: Asymptotics	194
15. Heat Curves: Verification of the Geometric Hypotheses	216
16. Fermi Curves: Basic Properties	221
17. Fermi Curves: Asymptotics	223
18. Fermi Curves: Verification of the Geometric Hypotheses	240
B. A Quantitative Morse Lemma	245
Chapter 4. The Kadomcev–Petviashvili Equation	249
Introduction	249
19. The Formula for the Solution	250
20. Approximations	254
21. Real Periodic Potentials	277
Bibliography	295
