

## CONTENTS

Introduction.....	1
Notations .....	21
Chapter I. The $(F)$ -property .....	25
§ 1. The $(F)$ -property for $\Lambda_{\omega}^n(\Phi)$ .....	25
§ 2. The multiplication .....	42
§ 3. The absence of the $(F)$ -property .....	46
Chapter II. Moduli of analytic functions smooth up to the boundary .....	54
§ 1. The class $\Lambda^d$ .....	54
§ 2. The outer functions in $H_n^p$ .....	83
§ 3. The class $\Lambda^{n-1}Z$ .....	97
§ 4. The embedding theorems of V.P.Havin-F.A.Shamoyan type .....	121
Chapter III. Zeros and their multiplicities .....	136
§ 1. Zero-sets of functions from $\Lambda_{\omega}$ .....	136
§ 2. Multiplicity of a boundary zero of some classes of functions .....	146
Chapter IV. Closed ideals in the space $X_{pq}^{\omega}(\omega, \ell)$ .....	174
§ 1. An equivalent norm in $X_{pq}^{\omega}(\omega, \ell)$ .....	176
§ 2. A special approximation in $X_{pq}^{\omega}(\omega, \ell)$ .....	185
References .....	207
Subject index .....	213
