TABLE OF CONTENTS

Preface v

Introduction 1

Chapter I. Approximation of functions and domains 13

§1. Domains of convergence 13

§2. Approximation by means of functions belonging to a complete family 26

§3. Runge domains and their generalization 47

§4. Expansion by orthogonal functions 56

§5. Properties of the kernel function of a domain 77

§6. Sequences of domains. Problem of convergence of holomorphy hulls 94

Chapter II. Fundamental problems. Coherent analytic sheaves 103

§7. Formulation of fundamental problems. Solution of Cousin's first problem for domains of holomorphy of the space C^n. Applications 103

§8. Coherent analytic sheaves over complex manifolds 110

§9. Coherent analytic sheaves over complex manifolds having properties (A) and (B) 128

§10. Proof of H. Cartan's Theorems (A) and (B) for cubes on the space C^n 136

§11. Proof of Theorems (A) and (B) for holomorphically complete complex manifolds 148

§12. Solution of fundamental problems for holomorphically complete complex manifolds 156

Chapter III. Domains analytically convex in the sense of Hartogs 171

§13. Plurisubharmonic functions 171

§14. Solution of the Hartogs inverse problem 194

§15. The Šilov and Bergman boundaries of domains of holomorphy 215

§16. Relative analytic convexity. Applications to the theory of approximation 226

Chapter IV. Holomorphic extension of domains 235
§17. General methods of holomorphic extension of domains 235
§18. Holomorphic extension of semitubular domains 251
§19. Holomorphic extension of domains of special type 259
Chapter V. Biholomorphic mappings 272
§20. Sets of holomorphic mappings 272
§21. Metric invariant under biholomorphic mappings of domains of the space C^n 282
§22. Representative coordinates of the Bergman metric 294
§23. Representative domains of the space C^2 304
§24. Homogeneous bounded domains 312
§25. Some estimates for biholomorphic mappings 327
§26. Quasi-biholomorphic mappings 337
Bibliography 347
Subject index 355
