

# Contents

## Chapter I

<b>Holomorphic Functions</b>	<b>1</b>
1 Power Series	2
2 Complex Differentiable Functions	8
3 The Cauchy Integral	10
4 Identity Theorems	15
5 Expansion in Reinhardt Domains	17
6 Real and Complex Differentiability	21
7 Holomorphic Mappings	26

## Chapter II

<b>Domains of Holomorphy</b>	<b>29</b>
1 The Continuity Theorem	29
2 Pseudoconvexity	35
3 Holomorphic Convexity	39
4 The Thullen Theorem	43
5 Holomorphically Convex Domains	46
6 Examples	51
7 Riemann Domains over $\mathbb{C}^n$	54
8 Holomorphic Hulls	62

## Chapter III

<b>The Weierstrass Preparation Theorem</b>	<b>68</b>
1 The Algebra of Power Series	68
2 The Weierstrass Formula	71

## Contents

3	Convergent Power Series	74
4	Prime Factorization	78
5	Further Consequences (Hensel Rings, Noetherian Rings)	81
6	Analytic Sets	84
Chapter IV		
<b>Sheaf Theory</b>		<b>99</b>
1	Sheaves of Sets	99
2	Sheaves with Algebraic Structure	105
3	Analytic Sheaf Morphisms	110
4	Coherent Sheaves	113
Chapter V		
<b>Complex Manifolds</b>		<b>119</b>
1	Complex Ringed Spaces	119
2	Function Theory on Complex Manifolds	124
3	Examples of Complex Manifolds	128
4	Closures of $\mathbb{C}^n$	144
Chapter VI		
<b>Cohomology Theory</b>		<b>150</b>
1	Flabby Cohomology	150
2	The Čech Cohomology	158
3	Double Complexes	163
4	The Cohomology Sequence	167
5	Main Theorem on Stein Manifolds	174
Chapter VII		
<b>Real Methods</b>		<b>179</b>
1	Tangential Vectors	179
2	Differential Forms on Complex Manifolds	185
3	Cauchy Integrals	188
4	Dolbeault's Lemma	191
5	Fine Sheaves (Theorems of Dolbeault and de Rham)	193
List of symbols		199
Bibliography		201
Index		203
