Part One: Function Theory on Domains in \mathbb{C}^n

| | |
|---|----|
| <i>Chapter 0 Elementary Properties of Holomorphic Functions</i> | 1 |
| § 1 Definition of Holomorphic Functions | 2 |
| § 2 $\mathcal{O}(X)$ as a Topological Algebra | 4 |
| § 3 Holomorphic Mappings | 7 |
| § 4 Cauchy's Integral Formula | 10 |
| Cauchy's Estimate, Abel's Lemma, Taylor Series, Liouville's Theorem | |
| § 4A Supplement: Cartan's Uniqueness Theorem and Automorphisms of Bounded Domains | 16 |
| § 5 Montel's Theorem | 17 |
| § 6 The Identity Theorem, the Maximum Principle, and Runge's Theorem | 19 |
| § 7 The Riemann Removable Singularity Theorems | 21 |
| Analytic Sets, Codimension, Kugelsatz | |
| § 8 The Implicit Mapping Theorem | 26 |
| Complex Functional Determinant, Inverse Mapping Theorem, Rank Theorem, Submanifolds | |
| | |
| <i>Chapter 1 Regions of Holomorphy</i> | 31 |
| § 11 Domains of Convergence of Power Series and Reinhardt Domains .. | 32 |
| Hartogs's Figure, Hartogs's Kontinuitätssatz | |
| § 12 Regions of Holomorphy and Holomorphic Convexity | 36 |
| Holomorphically Extendible at a Point, Thullen's Lemma | |
| § 12A Supplement: Further Extension Theorems for Holomorphic Functions | 43 |
| § 12B Supplement: The Edge-of-the-Wedge Theorem | 46 |

| | | |
|------|--------------------------------------|----|
| § 13 | Plurisubharmonic Functions | 49 |
| | Levi Form | |
| § 14 | Pseudoconvex Domains | 56 |

Part Two: Function Theory on Analytic Sets

| | | |
|---|---|----|
| <i>Chapter 2 The Weierstrass Preparation Theorem and its Applications</i> | | 64 |
| § 21 | Power Series Algebras | 65 |
| | the Norm $\ \cdot\ _r$, Homomorphisms of Power Series Algebras | |
| § 22 | The Weierstrass Theorems | 71 |
| | Distinguished Power Series, Weierstrass Preparation Theorem, Weierstrass Division Formula, Shearing | |
| § 23 | Algebraic Properties of ${}_n\mathcal{O}_0$ and ${}_n\mathcal{F}$ | 80 |
| | Noetherian Rings, Factorial Rings, Normal Rings, Hensel's Lemma, Representation of ${}_n\mathcal{O}_0[T]/(P)$ | |
| § 23 A | Supplement: Finite Ring-extensions, Normality | 86 |
| | Dedekind's Lemma, Nakayama's Lemma, Krull's Intersection Theorem, Equation of Integral Dependence | |
| § 24 | Analytic Algebras | 89 |
| | Finite Ring-homomorphism, Noether's Normalization Theorem, Finite Extensions of Analytic Algebras | |

| | | |
|--|--|-----|
| <i>Chapter 3 Complex Manifolds and the Elementary Theory of Complex Spaces</i> | | 92 |
| § 30 | Bringing in the Sheaves | 93 |
| § 31 | Ringed Spaces and Local Models of Complex Spaces | 97 |
| | Reduction, Subspaces and Ideal Sheaves, Comorphisms, Restriction Lemma, Nilpotent Elements | |
| § 32 | Complex Manifolds and Reduced Complex Spaces | 106 |
| | Projective Algebraic Varieties, Set of Singular Points, Tangent Space | |
| § 32 A | Supplement: Submersions and Immersions | 114 |
| § 32 B | Supplement: Examples of Complex Manifolds | 117 |
| | Lie Groups, Manifolds as Quotient Spaces, Torus, Grassmann Manifold, Transformation Groups, Quadratic Transformation | |
| § 33 | Zeros of Polynomials | 126 |
| | Branched Coverings, Finite Holomorphic Mappings | |
| § 33 A | Supplement: Resultants and Discriminants | 131 |
| § 33 B | Supplement: Proper Mappings and Equivalence Relations | 133 |

| | |
|--|-----|
| <i>Chapter 4 Complex Spaces</i> | 135 |
| § 41 Coherent Sheaves | 136 |
| Finite Type, Sheaf of Relations | |
| § 42 The Coherence of \mathcal{C} | 145 |
| § 43 Complex Spaces | 148 |
| § 44 Germs of Complex Spaces and Analytic Algebras | 154 |
| Decomposition of Germs into Irreducible Components | |
| § 45 Discrete and Finite Holomorphic Mappings | 161 |
| Finite Coherence Theorem, Local Characterization of Finite Morphisms, Embedding, Open Lemma, Complex Spaces over X | |
| § 45A Supplement: Image Sheaves | 170 |
| § 45B Supplement: The Analytic Spectrum | 172 |
| § 46 The Representation Theorem for Prime Germs | 173 |
| § 46A Supplement: Injective Holomorphic Mappings between Manifolds of the Same Dimension | 177 |
| § 46B Supplement: Universal Denominators for Prime Germs Thin Subsets, Weakly Holomorphic Functions | 178 |
| § 47 Hilbert's Nullstellensatz and Cartan's Coherence Theorem | 180 |
| § 48 Dimension Theory | 183 |
| Active Lemma | |
| § 49 Set of Singular Points and Decomposition into Irreducible Components | 191 |
| Identity Theorem, Semicontinuity of Dimension and of Fiber Dimension | |
| § 49A Supplement: Fiber Products and Quotients | 198 |
| Kernel and Cokernel of a Pair of Morphisms, Analytic Equivalence Relations, Group Actions, Orbit Spaces, Weighted Projective Spaces, Stein's Factorization Theorem | |

Part Three: Function Theory on Stein Spaces

| | |
|--|-----|
| <i>Chapter 5 Applications of Theorem B</i> | 213 |
| § 50 Introductory Remarks on Cohomology | 214 |
| Resolutions, Abstract de Rham Theorem, Čech Cohomology, Leray's Theorem | |
| § 50A Supplement: Automorphic Functions | 220 |
| § 51 Stein Spaces | 223 |
| § 51A Supplement: Countable Topology in Complex Spaces | 227 |

| | | |
|-------------------------------------|--|-----|
| § 52 | Theorem B and B-Spaces | 230 |
| | Existence Theorem for Global Holomorphic Functions, Exactness of the Analytic Section-Functor, Local Coordinates by Global Holomorphic Functions, Theorem A, Hartogs's Kugelsatz | |
| § 53 | The Additive Cousin Problem | 238 |
| | Meromorphic Functions | |
| § 53A | Supplement: Meromorphic Functions on Reduced Complex Spaces | 241 |
| | Normal Analytic Algebras, Indeterminate Points, Remarks on the Meromorphic Function Field of a Compact Complex Space | |
| § 54 | The Multiplicative Cousin Problem | 244 |
| | Divisors, Exponential Sequence, Chern Class, Locally Free Sheaves of Rank 1, Logarithm | |
| § 54A | Supplement: The Poincaré Problem | 249 |
| § 54B | Supplement: Holomorphic Line Bundles | 251 |
| | Locally Free Sheaves, Oka's Principle, Line Bundles on \mathbb{P}_1 | |
| § 55 | Coherent Analytic Sheaves as Fréchet Sheaves | 255 |
| | Canonical Topology, Privileged Neighborhoods | |
| § 56 | The Exhaustion Theorem | 263 |
| | Runge Pairs, Globally Generated Analytic Submodules | |
| § 57 | The Character Theorem and Holomorphic Hulls | 267 |
| | Spectrum, Maximal Ideals in Global Function Spaces, Holomorphic Hull, a Stein Quotient Space for a Holomorphically Convex Space | |
| § 58 | The Holomorphic Version of de Rham's Theorem | 272 |
| | Holomorphic Version of Poincaré's Lemma | |
| § 58A | Supplement: The Grassmann Algebra and Differential Forms | 275 |
| | Vector Fields, Tangent Spaces | |
| <i>Chapter 6 Proof of Theorem B</i> | 277 | |
| § 61 | Dolbeault's Lemma | 278 |
| | Poincaré Lemma ($\bar{\partial}$ -Version), de Rham's Theorem ($\bar{\partial}$ -Version), Polynomial Polyhedra, the Structure Sheaf of a Polydisk is Acyclic | |
| § 62 | Theorem B for Strictly Pseudoconvex Domains | 285 |
| | Finiteness Theorem of Cartan-Serre, Grauert's Solution of Levi's Problem | |
| § 63 | Characterization of Stein Spaces | 293 |
| | Weakly Holomorphically Convex Spaces, Runge Pairs, Characterization of Domains of Holomorphy in \mathbb{C}^n | |
| § 63A | Supplement: Levi's Problem for Pseudoconvex Domains | 298 |
| § 63B | Supplement: Weakly Holomorphically Convex Spaces are Holomorphically Convex | 301 |

| | |
|--|-----|
| <i>Supplement: Chapter 7 Normal Complex Spaces</i> | 302 |
| § 71 Normalization | 302 |
| Normal Complex Spaces, Riemann Removable Singularity Theorem, Universal Denominators | |
| § 72 Maximal Complex Structure | 310 |
| Characterization of Biholomorphic Mappings, Maximization, Normality of Quotient Spaces | |
| § 73 Finite Mappings on Stein Spaces | 313 |
| § 74 A Criterium for Normality | 314 |
| R-Sequence, Riemann Continuation Theorem for Cohomology Classes, Koszul Complex, Local Cohomology | |
| | |
| List of Examples | 323 |
| Bibliography | 325 |
| Glossary of Notations | 329 |
| Index | 337 |
