TABLE OF CONTENTS

INTRODUCTION ix

CHAPTER 1: EXAMPLES OF ISOLATED SINGULAR POINTS 1

A. Hypersurface singularities 1

B. Complete intersections 4

C. Quotient singularities 8

D. Quasi-conical singularities 12

E. Cusp singularities 16

CHAPTER 2: THE MILNOR FIBRATION 21

A. The link of an isolated singularity 21

B. Good representatives 25

C. Geometric monodromy 30

D. Excellent representatives 32

CHAPTER 3: PICARD-LEFSCHETZ FORMULAS 35

A. Monodromy of a quadratic singularity (local case) 36

B. Monodromy of a quadratic singularity (global case) 41

CHAPTER 4: CRITICAL SPACE AND DISCRIMINANT SPACE 44

A. The critical space 45

B. The Thom singularity manifolds 51

C. Development of the discriminant locus 54

D. Fitting ideals 59

E. The discriminant space 61

CHAPTER 5: RELATIVE MONODROMY 67

A. The basic construction 67

B. The homotopy type of the Milnor fibre 71

C. The monodromy theorem 79

CHAPTER 6: DEFORMATIONS 90
A. Relative differentials 91
B. The Kodaira-Spencer map 93
C. Versal deformations 100
D. Some analytic properties of versal deformations 107

CHAPTER 7: VANISHING LATTICES, MONODROMY GROUPS AND ADJACENCY 111
A. The fundamental group of a hypersurface complement 111
B. The monodromy goup 115
C. Adjacency 125
D. A partial classification 130

CHAPTER 8: THE LOCAL GAUSS-MANIN CONNECTION 137
A. De Rham cohomology of good representatives 138
B. The Gauss-Manin connection 146
C. The complete intersection case 154

CHAPTER 9: APPLICATIONS OF THE LOCAL GAUSS-MANIN CONNECTION 168
A. Milnor number and Tjurina number 168
B. Singularities with good $\mathbb{C}^*$-action 174
C. A period mapping 179
