

Contents

Preface	v
Chapter 1. Definitions and Examples of Complex Manifolds	1
1. Holomorphic Functions	1
2. Complex Manifolds and Pseudogroup Structures	7
3. Some Examples of Construction (or Description) of Compact Complex Manifolds	11
4. Analytic Families; Deformations	18
Chapter 2. Sheaves and Cohomology	27
1. Germs of Functions	27
2. Cohomology Groups	30
3. Infinitesimal Deformations	35
4. Exact Sequences	56
5. Vector Bundles	62
6. A Theorem of Dolbeault (A fine resolution of \mathcal{O})	73
Chapter 3. Geometry of Complex Manifolds	83
1. Hermitian Metrics; Kähler Structures	83
2. Norms and Dual Forms	92
3. Norms for Holomorphic Vector Bundles	100
4. Applications of Results on Elliptic Operators	102
5. Covariant Differentiation on Kähler Manifolds	106
6. Curvatures on Kähler Manifolds	116
7. Vanishing Theorems	125
8. Hodge Manifolds	134
Chapter 4. Applications of Elliptic Partial Differential Equations to Deformations	147
1. Infinitesimal Deformations	147
2. An Existence Theorem for Deformations I. (No Obstructions)	155
3. An Existence Theorem for Deformations II. (Kuranishi's Theorem)	165
4. Stability Theorem	173
Bibliography	186
Index	189
Errata	193
