Table of Contents

Chapter I. The Modular Group 1

§ 1. Inhomogeneous Linear Transformations 1
§ 2. Homogeneous Linear Transformations 3
§ 3. The Modular Group. Fixed Points 7
§ 4. Generators and Relations 14
§ 5. Fundamental Region 16

Chapter II. The Modular Functions of Level One 26

§ 1. Definition and Properties of Modular Functions 26
§ 2. Extension of the Modular Group by Reflections 33
§ 3. Existence of Modular Functions. The Absolute Modular Invariant J 35
§ 4. Modular Forms 38
§ 5. Entire Modular Forms 43

Chapter III. Eisenstein Series 50

§ 1. The Eisenstein Series in the Case of Absolute Convergence . . 50
§ 2. The Eisenstein Series in the Case of Conditional Convergence 63
§ 3. The Discriminant Δ 68

Chapter IV. Subgroups of the Modular Group. 71

§ 1. Subgroups of the Modular Group 71
§ 2. The Principal Congruence Groups 73
§ 3. Congruence Groups 77
§ 4. Fundamental Region 79
§ 5. Fundamental Regions for Special Subgroups. 83
§ 6. The Quotient Space $\mathfrak{H}^*/\Gamma_1$ 89
§ 7. Genus of the Fundamental Region 93
§ 8. The Genus of the Fundamental Region of $\Gamma_0(N)$ 99

Chapter V. Function Theory for the Subgroups of Finite Index in the Modular Group 104

§ 1. Functions for Subgroups 104

§ 2. Modular Forms for Subgroups 109
§ 3. Modular Forms of Dimension -2 and Integrals 115
§ 4. The Riemann-Roch Theorem and Applications 120

Chapter VI. Fields of Modular Functions 127

§ 1. Algebraic Field Extensions of $\mathbb{C}(J)$ 127
§ 2. The Fields $\mathbb{C}(\sqrt{J-1})$ and $\mathbb{C}(\sqrt[3]{J})$ 130
§ 3. Transformation Groups of Order n 132
§ 4. Transformation Fields of Order n 139
§ 5. The Modular Equation of Order n 142
§ 6. The Galois Group of the Modular Equation 146
§ 7. Transformations of Order n for Modular Forms 148

Chapter VII. Eisenstein Series of Higher Level 154

§ 1. The Series in the Case of Absolute Convergence 154
§ 2. The Series of Dimension -1 and -2 164
§ 3. Properties of the Series of Dimension -1 and -2. Applications 168
§ 4. Division Equation 178

Chapter VIII. The Integrals of $\wp$-Division Values 184

§ 1. The Space of $\wp$-Division Values. Integrals 184
§ 2. An Asymptotic Formula and the Behavior of the Integrals under the Transformation T 188
§ 3. A Second Look at the Behavior of the Integrals under the Transformation T. The General Transformation Formula 194
§ 4. Consequences of the Transformation Formula 199

Chapter IX. Theta Series 203

§ 1. General Theta Series. An Operator 203
§ 2. Special Theta Series 207
§ 3. Behavior of the Theta Series under Modular Transformations 212
§ 4. Behavior of the Theta Series under Congruence Groups. Gaussian Sums 215
§ 5. Examples and Applications 221

Literature 227

Index of Definitions 231

Index of Notations 233
