

C O N T E N T S

Introduction	1
--------------------	---

Sections

1. Siegel domains	3
2. Affine automorphism groups of Siegel domains	9
3. Affinely homogeneous Siegel domains	23
4. Generalised Siegel domains	29
5. Vector fields belonging to $\mathcal{G}(D)$	34
6. Structure of $\mathcal{G}(D)$ for D with $c = \frac{1}{2}$	38
7. Lie algebras $\mathcal{G}(D)$ for Siegel domains	52
8. Lie algebras $\mathcal{G}(D)$ for homogeneous Siegel domains	62
9. Examples	76
