## **1 Music: Why You Record 1**

Increasing Your Involvement in Music 2

Different Ways of Listening 2

Why Record? 3

## **2 The Recording Chain 5**

Types of Recording 6

Live Stereo Recording 7

Live-Mix Recording 8

Separate Multitrack Recorder and Mixer 9

Stand-Alone DAW (Recorder-Mixer) 11

Computer DAW 11

MIDI Sequencing 13

Pros and Cons of Each Method 14

Editing/Mastering 16

Quality Levels of Recording Formats 16

## **3 Sound, Signals, and Studio Acoustics 19**

Sound Wave Creation 19

Characteristics of Sound Waves 21

Amplitude 21

Frequency 21

Wavelength 22

Phase and Phase Shift 22

Phase Interference 23

|   |    |
|---|----|
| Harmonics   | 24 |
| Envelope  | 25 |
| Behavior of Sound in Rooms                          | 26 |
| Echoes  | 26 |
| Reverberation                                       | 27 |
| Diffusion   | 29 |
| Leakage   | 29 |
| How to Tame Echoes, Reverb, and Leakage             | 30 |
| Controlling Room Problems with Recording Techniques | 30 |
| Controlling Room Problems with Acoustic Treatments  | 30 |
| Controlling Standing Waves                          | 33 |
| Making a Quieter Studio                             | 33 |
| Signal Characteristics of Audio Devices             | 35 |
| Frequency Response                                  | 36 |
| Noise   | 38 |
| Distortion  | 38 |
| Optimum Signal Level                                | 38 |
| Signal-to-Noise Ratio                               | 38 |
| Headroom  | 39 |

## **4 Equipping Your Studio 41**

|  |    |
|--|----|
| Low-Cost Recording Equipment             | 42 |
| Microphone                               | 42 |
| Monitor System                           | 43 |
| Recording Device                         | 43 |
| Higher-Cost Recording Equipment          | 48 |
| Mixer                                    | 49 |
| Hard-Disk Recorder (HD Recorder)         | 49 |
| Processors                               | 50 |
| HD Recorder-Mixer with 16 to 32 Tracks   | 50 |
| High-End Recording Software and Hardware | 50 |
| Equipment Details                        | 51 |
| Recorder                                 | 51 |
| Mixer                                    | 52 |
| Effects                                  | 53 |

| Phantom-Power Supply                     | 54 |
| Mic Preamp                               | 54 |

|                                       |    |
|---------------------------------------|----|
| Direct Box                            | 55 |
| Monitor System                        | 55 |
| Rack and Patch Bay                    | 56 |
| Miscellaneous Equipment               | 56 |
| Blank Recording Media                 | 56 |
| MIDI Studio Equipment                 | 57 |
| Setting Up Your Studio                | 59 |
| Cables                                | 59 |
| Equipment Connectors                  | 60 |
| Cable Connectors                      | 61 |
| Cable Types                           | 63 |
| Rack/Patch Bay                        | 65 |
| Equipment Connections                 | 66 |
| Acoustic Treatment                    | 69 |
| Hum Prevention                        | 70 |
| Reducing Radio Frequency Interference | 72 |

## **5 Monitoring 73**

|                             |    |
|-----------------------------|----|
| Speaker Requirements        | 74 |
| Nearfield™ Monitors         | 75 |
| Powered (Active) Monitors   | 77 |
| The Power Amplifier         | 77 |
| Speaker Cables and Polarity | 78 |
| Control-Room Acoustics      | 78 |
| Speaker Placement           | 80 |
| Using the Monitors          | 81 |
| Headphones                  | 82 |
| The Cue System              | 83 |
| Conclusion                  | 85 |

## **6 Microphones 87**

|  |    |
|--|----|
| Transducer Types                       | 87 |
| General Traits of Each Transducer Type | 90 |
| Polar Pattern                          | 91 |
| Traits of Various Polar Patterns       | 93 |
| Frequency Response                     | 94 |
| Impedance (Z)                          | 97 |

|                                      |     |
|--------------------------------------|-----|
| Maximum SPL                          | 97  |
| Sensitivity                          | 97  |
| Self-Noise                           | 98  |
| Signal-to-Noise Ratio                | 98  |
| Polarity                             | 99  |
| Microphone Types                     | 99  |
| Large-Diaphragm Condenser Microphone | 99  |
| Small-Diaphragm Condenser Microphone | 99  |
| Dynamic Instrument Microphone        | 100 |
| Live-Vocal Microphone                | 100 |
| Ribbon Microphone                    | 100 |
| Boundary Microphone                  | 100 |
| Miniature Microphone                 | 101 |
| Stereo Microphone                    | 102 |
| Digital Microphone                   | 103 |
| Headworn Microphone                  | 103 |
| Microphone Selection                 | 103 |
| Mic Accessories                      | 105 |
| Pop Filter                           | 105 |
| Stands and Booms                     | 105 |
| Shock Mount                          | 106 |
| Cables and Connectors                | 106 |
| Snake                                | 107 |
| Splitter                             | 107 |
| Summary                              | 108 |

## **7 Microphone Technique Basics 109**

|                                   |     |
|-----------------------------------|-----|
| Which Mic Should I Use?           | 109 |
| How Many Mics?                    | 111 |
| How Close Should I Place the Mic? | 113 |
| Leakage                           | 114 |
| Don't Mike Too Close              | 115 |
| Where Should I Place the Mic?     | 116 |
| On-Surface Techniques             | 117 |
| The Three-to-One Rule             | 119 |
| Off-Axis Coloration               | 120 |
| Stereo Mic Techniques             | 120 |
| Goals of Stereo Miking            | 120 |
| Types of Stereo Mic Techniques    | 121 |

---

|                               |     |
|-------------------------------|-----|
| Comparing the Four Techniques | 128 |
| Hardware                      | 129 |
| How to Test Imaging           | 129 |

## **8** Microphone Techniques 131

|   |     |
|---|-----|
| Electric Guitar                               | 131 |
| Miking the Amp                                | 132 |
| Recording Direct                              | 133 |
| Electric Guitar Effects                       | 134 |
| Electric Bass                                 | 135 |
| Synthesizer, Drum Machine, and Electric Piano | 137 |
| Leslie Organ Speaker                          | 137 |
| Drum Set                                      | 138 |
| Tuning  | 139 |
| Damping and Noise Control                     | 140 |
| Drum Miking                                   | 140 |
| Snare   | 140 |
| Hi-Hat  | 142 |
| Tom-Toms                                      | 142 |
| Kick Drum                                     | 143 |
| Cymbals                                       | 144 |
| Room Mics                                     | 145 |
| Boundary Mic Techniques                       | 145 |
| Recording with Two to Four Mics               | 145 |
| Drum Recording Tips                           | 147 |
| Percussion                                    | 149 |
| Acoustic Guitar                               | 149 |
| Singer/Guitarist                              | 151 |
| Grand Piano                                   | 151 |
| Upright Piano                                 | 154 |
| Acoustic Bass                                 | 155 |
| Banjo   | 156 |
| Mandolin, Dobro, Bouzouki, and Lap Dulcimer   | 157 |
| Hammered Dulcimer                             | 157 |
| Fiddle (Violin)                               | 157 |
| String Section                                | 159 |
| String Quartet                                | 160 |
| Bluegrass Band and Old-Time String Band       | 160 |
| Harp  | 160 |

|  |     |
|--|-----|
| Horns  | 161 |
| Saxophone                                    | 161 |
| Woodwinds                                    | 162 |
| Harmonica, Accordion, and Bagpipe            | 164 |
| Lead Vocal                                   | 164 |
| Miking Distance                              | 165 |
| Breath Pops                                  | 166 |
| Wide Dynamic Range                           | 166 |
| Sibilance                                    | 167 |
| Reflections from the Music Stand and Ceiling | 167 |
| Vocal Effects                                | 168 |
| Background Vocals                            | 168 |
| Spoken Word                                  | 169 |
| Choir and Orchestra                          | 169 |
| Summary                                      | 170 |

## **9 Digital Recording 171**

## **10 Effects and Signal Processors 201**

|   |     |
|---|-----|
| Software Effects (Plug-Ins)                 | 201 |
| Equalizer                                   | 202 |
| Types of EQ                                 | 203 |
| How to Use EQ                               | 206 |
| When to Use EQ                              | 208 |
| Uses of EQ                                  | 209 |
| Compressor                                  | 211 |
| Using a Compressor                          | 212 |
| Compression Ratio or Slope                  | 213 |
| Threshold                                   | 213 |
| Gain Reduction                              | 213 |
| Attack Time                                 | 214 |
| Release Time                                | 214 |
| Output-Level Control                        | 214 |
| Connecting a Compressor                     | 215 |
| Suggested “Ballpark” Compressor Settings    | 215 |
| limiter                                     | 216 |
| Noise Gate                                  | 217 |
| Delay: Echo, Doubling, Chorus, and Flanging | 218 |
| Echo  | 218 |
| Slap Echo                                   | 220 |
| Repeating Echo                              | 220 |
| Doubling                                    | 220 |
| Chorus                                      | 221 |
| Stereo Chorus                               | 221 |
| Bass Chorus                                 | 221 |
| Flanging                                    | 221 |
| Reverberation                               | 222 |
| Preverb                                     | 225 |
| Enhancer                                    | 226 |
| Octave Divider                              | 226 |

## **14 Judging Sound Quality 317**

- Classical versus Popular Recording 317
- Good Sound in a Pop-Music Recording 318
  - A Good Mix 319
  - Wide Range 320
  - Good Tonal Balance 320
  - Clean Sound 321
  - Clarity 321
  - Smoothness 322
  - Presence 322
  - Spaciousness 322
  - Sharp Transients 322
  - Tight Bass and Drums 322
  - Wide and Detailed Stereo Imaging 323
  - Wide but Controlled Dynamic Range 324
  - Interesting Sounds 324
  - Suitable Production 325
- Good Sound in a Classical-Music Recording 325
  - Good Acoustics 325
  - A Natural Balance 326
  - Tonal Accuracy 326
  - Suitable Perspective 326
  - Accurate Imaging 326
- Training Your Hearing 328
- Troubleshooting Bad Sound 329
  - Bad Sound on All Recordings 330
  - Bad Sound on Playback Only 330

- Bad Sound in a Pop-Music Recording Session 331  
Bad Sound in a Classical-Music Recording 338

## **15 Session Procedures, Editing, Mastering, and CD Burning 343**

- Preproduction 344  
    Instrumentation 344  
    Recording Order 344  
    Track Assignments 345  
    Session Sheet 345  
    Production Schedule 346  
    Track Sheet 346  
    Microphone Input List 346  
    Instrument Layout Chart 349  
Setting Up the Studio 349  
Setting Up the Control Room 350
