

Table of Contents

Locating RF Emitters with Large UAV Teams	1
<i>Paul Scerri, Robin Grinton, Sean Owens, and Katia Sycara</i>	
Out-of-Order Sigma-Point Kalman Filtering for Target Localization Using Cooperating Unmanned Aerial Vehicles	21
<i>Gregory L. Plett, Dimitri Zarzhitsky, and Daniel J. Pack</i>	
Multi-cumulant Control for Zero-Sum Differential Games: Performance-Measure Statistics and State-Feedback Paradigm	45
<i>Khanh D. Pham</i>	
Decentralized Cooperative Optimization for Multi-criteria Decision Making	65
<i>Cristinca Fulga</i>	
Simultaneous Localization and Planning for Cooperative Air Munitions	81
<i>Andrew J. Sinclair, Richard J. Prazenica, and David E. Jeffcoat</i>	
Second-Order Cone Programming (SOCP) Techniques for Coordinating Large-Scale Robot Teams in Polygonal Environments	95
<i>Jason C. Derenick and John R. Spletzer</i>	
UAV Splay State Configuration for Moving Targets in Wind	109
<i>Derek Kingston and Randal Beard</i>	
A Risk-Based Approach to Sensor Resource Management	129
<i>Dimitri Papageorgiou and Maxim Raykin</i>	
Constructing Optimal Cyclic Tours for Planar Exploration and Obstacle Avoidance : A Graph Theory Approach	145
<i>Abhishek Tiwari, Harish Chandra, Jacob Yadegar, and Junxian Wang</i>	
An Analysis and Solution of the Sensor Scheduling Problem	167
<i>Mesut Yavuz and David Jeffcoat</i>	
Cooperative Vision Based Estimation and Tracking Using Multiple UAVs	179
<i>Brett Bethke, Mario Valenti, and Jonathan How</i>	

Waypoint Selection in Constrained Domains (for Cooperative Systems)	191
<i>Yongjie Zhu, Yongling Zheng, and Ümit Özgüner</i>	
Cooperative Formation Flying in Autonomous Unmanned Air Systems with Application to Training	203
<i>Hongliang Yuan, Vivian Gottesman, Mark Falash, Zhihua Qu, Etyan Pollak, and Jiangmin Chunyu</i>	
Virtual Leader Based Formation Control of Multiple Unmanned Ground Vehicles (UGVs): Control Design, Simulation and Real-Time Experiment	221
<i>Wenchuan Cai, Liguo Weng, R. Zhang, M. Zhang, and Y.D. Song</i>	
Cooperative Control of Multiple Agents and Search Strategy	231
<i>Vitaliy A. Yatsenko, Michael J. Hirsch, and Panos M. Pardalos</i>	
Real-Time Optimal Time-Critical Target Assignment for UAVs	265
<i>Yoonsoo Kim, Da-Wei Gu, and Ian Postlethwaite</i>	
Sequential Inspection Using Loitering	281
<i>Meir Pachter, Swaroop Darbha, and P. Chandler</i>	
Distributed Cooperative Systems with Human Operator-in-the-Loop	293
<i>Pavlo A. Krokhmal and David E. Jeffcoat</i>	
Decentralized Extremum-Seeking Control of Nonholonomic Vehicles to Form a Communication Chain	311
<i>Cory Dixon and Eric W. Frew</i>	
An Adaptive Sequential Game Theoretic Approach to Coordinated Mission Planning for Aerial Platforms	323
<i>Dan Shen, Genshe Chen, Jose B. Cruz Jr., and Khanh D. Pham</i>	
Characteristics of the Distribution of Hamming Distance Values Between Multidimensional Assignment Problem Solutions	339
<i>Alla R. Kammerdiner, Pavlo A. Krokhmal, and Panos M. Pardalos</i>	
Robust Cooperative Visual Tracking: A Combined NonLinear Dimensionality Reduction/Robust Identification Approach	353
<i>Vlad I. Morariu, Octavia I. Camps, Mario Sznaiier, and Hwasup Lim</i>	
A Lagrangian-Based Algorithm for a Combinatorial Motion Planning Problem	373
<i>Sai K. Yadlapalli, Waqar A. Malik, Swaroop Darbha, and Siva Rathinam</i>	

A Random Keys Based Genetic Algorithm for the Target Visitation Problem	389
<i>Ashwin Arulsevan, Clayton W. Commander, and Panos M. Pardalos</i>	
Cooperative Rendezvous Between Active Autonomous Vehicles	399
<i>Yechiel J. Crispin and Marie E. Ricour</i>	
Author Index	423
