

# CONTENTS

<b>Introduction. Periodic Functions, Fourier Series</b> . . . . .	<b>1</b>
<b>I. Almost Periodic Functions</b> . . . . .	<b>9</b>
1. Definitions and fundamental properties . . . . .	9
2. Two characteristic properties of almost periodic functions	14
3. The Fourier series associated with an almost periodic function . . . . .	23
4. Convergence of Fourier series . . . . .	31
5. Summability of Fourier series . . . . .	38
6. Almost periodic numeric sequences and their connection with almost periodic functions . . . . .	45
Bibliographical notes . . . . .	49
<b>II. Almost Periodic Functions Depending on Parameters</b> . . . . .	<b>51</b>
1. Almost periodic functions depending uniformly on parameters . . . . .	51
2. Almost periodic functions in the mean . . . . .	58
<b>III. Analytic Almost Periodic Functions</b> . . . . .	<b>66</b>
1. Preliminary theorems . . . . .	66
2. Elementary properties of analytic almost periodic functions . . . . .	73
3. The Dirichlet series associated with an analytic almost periodic function . . . . .	77
4. The behavior at infinity of analytic almost periodic functions in a half-plane . . . . .	83
Bibliographical notes . . . . .	87
<b>IV. Almost Periodic Solutions of Ordinary Differential Equations</b> . . . . .	<b>88</b>
1. The primitive of an almost periodic function . . . . .	88
2. Linear systems with constants coefficients . . . . .	90
3. Quasilinear systems . . . . .	98

4. An Amerio criterion for almost periodicity of bounded solutions . . . . .	102
5. The equation of non-linear oscillations . . . . .	109
Bibliographical notes . . . . .	114
<b>V. Almost Periodic Solutions of Partial Differential Equations . . . . .</b>	<b>116</b>
1. Some properties of harmonic and polyharmonic functions . . . . .	116
2. Harmonic and polyharmonic almost periodic functions . . . . .	121
3. Almost periodic solutions of hyperbolic equations . . . . .	128
4. Almost periodic solutions of certain parabolic equations . . . . .	132
Bibliographical notes . . . . .	135
<b>VI. Almost Periodic Functions with Values in Banach Spaces . . . . .</b>	<b>137</b>
1. Definitions and general properties . . . . .	137
2. The Banach space of almost periodic functions . . . . .	142
3. The Fourier series attached to an almost periodic function with values in a Banach space. The approximation theorem . . . . .	144
4. Almost periodic functions in the Muckenhoupt sense and in the Stepanov sense . . . . .	156
5. Weakly almost periodic functions. The primitive of an almost periodic function . . . . .	159
Bibliographical notes . . . . .	165
<b>VII. Almost Periodic Functions on Groups . . . . .</b>	<b>168</b>
1. Elementary properties of almost periodic functions on groups. The existence of the mean . . . . .	168
2. Unitary representations of groups. The Fourier series associated with an almost periodic function . . . . .	178
3. The uniqueness and approximation theorems . . . . .	185
4. Almost periodic functions on topological groups . . . . .	192
Bibliographical notes . . . . .	195
<b>Appendix . . . . .</b>	<b>198</b>
<b>References . . . . .</b>	<b>203</b>
<b>Index . . . . .</b>	<b>234</b>
