

CONTENTS

Foreword.	xi
Publications of Thomas Murray MacRobert.	xv
<i>Chapter I. Fourier Series.</i>	1
§ 1 Fourier's Expansion.	1
§ 2 Validity of the Expansion.	5
§ 3 Dirichlet's Integrals.	6
§ 4 Summation of the Fourier Series.	9
§ 5 Sine Series and Cosine Series.	11
§ 6 Other Forms of Fourier Series.	12
§ 7 Fourier's Double Integral.	15
Examples.	19
<i>Chapter II. Conduction of Heat.</i>	22
§ 1 Definitions.	22
§ 2 Flow of Heat across any Surface.	24
§ 3 The Equation of Conduction.	25
§ 4 Initial and Boundary Conditions.	27
§ 5 Uniqueness of the Solution.	29
§ 6 Infinite Slab with Parallel Faces.	30
§ 7 Radiation at the Surface of a Rod of Small Cross-section.	32
§ 8 Fourier's Ring.	34
§ 9 Duhamel's Theorem.	36
§ 10 Finite Rod with Variable End Temperatures.	37
§ 11 Steady Temperature in an Infinite Rectangular Solid.	39
§ 12 Rectangular Parallelepiped: Steady Temperature.	40
§ 13 Rectangular Parallelepiped: Variable Temperature.	42
§ 14 Infinite Rod: No Radiation.	44
§ 15 Infinite Solid.	45
Examples.	47
<i>Chapter III. Transverse Vibrations of Stretched Strings.</i>	49
§ 1 The Differential Equation.	49
§ 2 Solutions of the Equation.	52
§ 3 Normal Modes of a Finite String.	53
§ 4 Vibrations of a Harp String.	56
§ 5 Vibrations of a Violin String.	58
§ 6 Vibrations of a Piano String.	61
§ 7 Vibrations of Membranes.	64

<i>Chapter IV. Spherical Harmonics: The Hypergeometric Function.</i>	67
§ 1 The Potential Function.	67
§ 2 The Legendre Coefficients.	67
§ 3 Laplace's Coefficients.	68
§ 4 Spherical Harmonics.	69
§ 5 Legendre's Equation.	71
§ 6 Legendre's Associated Equation.	71
§ 7 The Hypergeometric Function.	72
§ 8 The Hypergeometric Equation.	72
§ 9 The Four Forms of the Hypergeometric Function.	74
§ 10 The Asymptotic Expansion of the Hypergeometric Function.	75
§ 11 Formulae for the Gamma Function and other Functions.	76
Examples.	78
 <i>Chapter V. The Legendre Polynomials.</i>	 79
§ 1 Legendre's Expansion.	79
§ 2 Expansion of $P_n(\mu)$ in Powers of μ .	80
§ 3 Expansion of $P_n(\mu)$ in Powers of $\frac{1}{2}(1-\mu)$.	81
§ 4 Rodrigues' Formula.	82
§ 5 The Zeros of $P_n(\mu)$.	84
§ 6 Integrals of Products of Legendre Polynomials.	85
§ 7 Expression of a Polynomial as a Linear Function of Legendre Polynomials.	88
§ 8 The Recurrence Formulae.	91
§ 9 Laplace's First Integral.	93
§ 10 Laplace's Second Integral.	94
§ 11 Expansion of a Function in a Series of Legendre Polynomials.	95
Examples.	96
 <i>Chapter VI. The Legendre Functions.</i>	 101
§ 1 Legendre Functions of the Second Kind.	101
§ 2 Legendre Functions of the First Kind.	104
§ 3 The Recurrence Formulae for $P_n(x)$.	104
§ 4 The Recurrence Formulae for $Q_n(x)$.	105
§ 5 Theorem.	107
Examples.	108
 <i>Chapter VII. The Associated Legendre Functions of Integral Order.</i>	 113
§ 1 Solution of Legendre's Associated Equation.	113
§ 2 Relations between the Associated Legendre Functions.	115
§ 3 Ferrers' Associated Legendre Function of the First Kind.	116
§ 4 Integrals of Products of Associated Legendre Functions.	117
§ 5 Laplace's First Integral for $P_n^m(x)$.	118
§ 6 Laplace's Second Integral for $P_n^{-m}(x)$.	120
§ 7 Spherical Harmonics of Integral Degree.	121
§ 8 Expression of a Surface Spherical Harmonic of Integral degree in terms of Zonal, Tesseral and Sectorial Harmonics.	124

§ 9 Integrals of Products of Surface Spherical Harmonics.	125
§ 10 The Laplace Coefficients.	126
§ 11 The Addition Theorem for the Zonal Harmonics.	127
§ 12 Expansion of a rational integral function of $\cos \theta$, $\sin \theta \cos \phi$, $\sin \theta \sin \phi$, in terms of Surface Spherical Harmonics.	128
§ 13 Expansion of an Arbitrary Function of θ and ϕ in a Series of Spher- ical Harmonics.	131
Examples.	132
<i>Chapter VIII. Applications of Legendre Coefficients to Potential Theory.</i>	134
§ 1 The Newtonian Law of Attraction.	134
§ 2 The Potential.	135
§ 3 Some Properties of the Potential.	136
§ 4 Expression for the Potential in terms of Spherical Harmonics.	138
§ 5 Potential of a Thin Uniform Wire bent into the form of a Circle.	140
§ 6 Attraction of a Uniform Circular Lamina.	142
§ 7 Potentials of a Magnet and of a Magnetic Shell.	144
<i>Chapter IX. Potentials of Spherical Shells, Spheres and Spheroids.</i>	146
§ 1 General Theorems on the Potential.	146
§ 2 Potential of a Thin Spherical Shell of Given Surface Density.	147
§ 3 Potential of a Thin Spherical Shell when the Value of the Potential on the Surface is given.	149
§ 4 A Theorem on Inverse Points.	150
§ 5 Poisson's Integrals.	151
§ 6 Potential of a Thick Spherical Shell when the Density is given.	151
§ 7 Equivalent Distributions of Masses.	155
§ 8 The First Boundary Problem for the Sphere.	155
§ 9 The Second Boundary Problem for the Sphere.	157
§ 10 Potential of a Homogeneous Spheroid.	159
§ 11 Potential of a Heterogeneous Spheroid.	162
<i>Chapter X. Applications to Electrostatics.</i>	165
§ 1 Distribution of Electricity in a Conductor in Electrical Equilibrium.	165
§ 2 Distribution of Electricity on an Insulated Conducting Sphere.	165
§ 3 Insulated Sphere and External Point-charge.	167
§ 4 Distribution of Electricity on an Uninsulated Conducting Sphere.	170
§ 5 Uninsulated Sphere and External Point-charge.	170
§ 6 The Green's Function.	171
§ 7 Thick Spherical Conducting Shell under the Influence of External Electrical Forces.	173
§ 8 Thick Spherical Conducting Shell under the Influence of Internal Electrical Forces.	174
§ 9 Insulated Conducting Spheroid.	176

<i>Chapter XI. Ellipsoids of Revolution.</i>	179
§ 1 Transformation of Laplace's and Poisson's Equations to an Orthogonal System of Curvilinear Co-ordinates.	179
§ 2 Prolate Ellipsoids of Revolution.	182
§ 3 Laplace's Equation in Elliptic Co-ordinates.	183
§ 4 Expression for the Reciprocal of the Distance between two Points in Elliptic Co-ordinates.	188
§ 5 Oblate Ellipsoids of Revolution.	194
§ 6 Transformation and Solution of Laplace's Equations.	195
§ 7 Expression for the Reciprocal of the Distance between two Points.	198
 <i>Chapter XII. Eccentric Spheres.</i>	 201
§ 1 Dipolar Co-ordinates in Two Dimensions.	201
§ 2 Dipolar Co-ordinates in Three Dimensions.	203
§ 3 The Problem of Two Eccentric Spheres.	204
§ 4 Solution of Laplace's Equation.	207
§ 5 Ring Surfaces.	209
 <i>Chapter XIII. Clerk Maxwell's Theory of Spherical Harmonics.</i>	 212
§ 1 Theorem.	212
§ 2 Poles of a Spherical Harmonic.	215
§ 3 Poles of Zonal, Tesseral and Sectorial Harmonics.	218
 <i>Chapter XIV. Bessel Functions.</i>	 221
§ 1 Bessel's Equation.	221
§ 2 Solution of the Differential Equation.	222
§ 3 Recurrence Formulae for $J_n(x)$.	228
§ 4 Expressions for $J_n(x)$ when n is half an odd integer.	229
§ 5 The Bessel Coefficients.	229
§ 6 Expansion of x^n in a Series of Bessel Functions.	232
§ 7 Definite Integral Expressions for the Bessel Functions.	233
§ 8 The Function $G_n(x)$.	235
§ 9 Relations between the Bessel Functions.	238
§ 10 Addition Theorems for Y_n and G_n .	238
Examples.	240
 <i>Chapter XV. Asymptotic Expansions and Fourier-Bessel Expansions.</i>	 243
§ 1 Additional Definite Integral Expressions for the Bessel Functions.	243
§ 2 The Modified Bessel Functions I_n and K_n .	247
§ 3 The Asymptotic Expansions.	250
§ 4 Lommel Integrals.	253
§ 5 Zeros of the Bessel Functions.	255
§ 6 The Fourier-Bessel Expansions.	260
Examples.	262

<i>Chapter XVI. Applications of Bessel Functions.</i>	263
§ 1 Vibrations of a Circular Membrane.	263
§ 2 Flow of Heat in a Circular Cylinder.	265
§ 3 Flow of Heat in a Sphere.	268
Examples.	271
<i>Chapter XVII. The Hypergeometric Function.</i>	274
§ 1 The Hypergeometric Equation.	274
§ 2 Gauss's Theorem.	275
§ 3 The Four Forms of the Hypergeometric Function.	278
§ 4 Relations between the Integrals of the Hypergeometric Equation.	280
§ 5 The Asymptotic Expansion.	283
§ 6 Generalised Hypergeometric Functions.	284
§ 7 Kummer's Function.	286
<i>Chapter XVIII. Associated Legendre Functions of General Order.</i>	288
§ 1 Solution of Legendre's Associated Equation.	288
§ 2 Relations between the Integrals of Legendre's Associated Equation.	290
§ 3 The Asymptotic Expansions.	294
§ 4 The Mehler-Dirichlet Integral.	297
§ 5 Dougall's Formulae.	299
§ 6 The Addition Theorem.	301
§ 7 Recurrence Formulae.	302
§ 8 Functions of the First kind when the sum of the Degree and the Order is a Positive Integer.	305
§ 9 Expansion of a function in a series of associated Legendre functions.	308
§ 10 Related Formulae for the Bessel and Legendre Functions.	311
Examples.	314
Miscellaneous Examples.	317
Selected Bibliography.	339
Index.	341
Other Titles in the Series.	347
