Contents

List of Symbols IX

Introduction 1

Chapter I. Some Information from the Theory of Cylindrical Functions . . 5

1. The Differential Equation and Recursion Relationships for Cylindrical Functions 5
2. Generalized System of Functional Equations for Cylindrical Functions and the Inhomogenious Bessel Differential Equation 8
3. Integral Repesentations of Cylindrical Functions in the Poisson Form 11
4. Integral Representations of Cylindrical Functions of the Bessel-Schlaefli and Sonine Form 17

Chapter II. General Theory of Incomplete Cylindrical Functions Expressed in Poisson Form 21

1. Definitions of Incomplete Cylindrical Functions as Poisson Integrals 22
2. Recurrence Relations for the Incomplete Cylindrical Functions . . . 27
3. Some General Properties of Incomplete Cylindrical Functions . . . 32
4. Differential Equations for Incomplete Cylindrical Functions 35
5. Incomplete Lipschitz-Hankel Integrals 41
6. The Relation between the Incomplete Lipschitz-Hankel Integrals and Incomplete Cylindrical Functions of Poisson Form 48
7. Series Representations for Incomplete Cylindrical Functions 52
8. Incomplete Beta and Gamma Functions and their Relation to Hypergeometric Functions 57
9. Asymptotic Series and Methods for their Construction 61
10. Asymptotic Expansion for Incomplete Cylindrical Functions of Poisson Form 66

Chapter III. Incomplete Cylindrical Functions of Bessel Form 76

1. Definitions of Incomplete Cylindrical Functions of Bessel Form . . 76
2. Recursion Relations and Differential Equations for the Function $\varepsilon_\nu(w, z)$ 79
3. Connection between Incomplete Cylindrical Functions of the Poisson and Bessel Forms 82
4. Incomplete Cylindrical Functions of Bessel Form with Half-Odd Indices 85
5. A Generating Function, Addition Formula, and Series for the Function $\varepsilon_\nu(w, z)$ 89

6. Asymptotic Expansions for Incomplete Cylindrical Functions of the Bessel Form 95
7. Asymptotic Expansions for Incomplete Cylindrical Functions; the General Case 103
8. Incomplete Airy Integrals and their Generalizations 108
9. Asymptotic Expansions of Incomplete Cylindrical Functions of the Bessel Form for Large Indices 112

Chapter IV. Incomplete Cylindrical Functions of Sonine-Schlaefli Form and the Incomplete Weber Integrals 116

1. The Concept of Incomplete Cylindrical Functions of Whittaker Form 116
2. Incomplete Cylindrical Functions of Sonine-Schlaefli Form and their Basic Properties 117
3. Incomplete Weber Integrals 121
4. The Connection between the Incomplete Weber Integral, Incomplete Cylindrical Functions, and Lipschitz-Hankel Integrals 129
5. The Connection between Incomplete Integrals of Weber, Lipschitz-Hankel and Incomplete Cylindrical Functions of Poisson Form . . . 135
6. The Connection between Incomplete Weber Integrals and Lommel Functions of Two Variables 138

Chapter V. Incomplete Cylindrical Functions of Real Arguments and their Relation to Certain Discontinuous Integrals 141

1. Incomplete Cylindrical Functions of Real Arguments 141
2. Unit Functions and their Basic Characteristics 143
3. New Integral Representations for Incomplete Cylindrical Functions of Real Arguments 146
4. Relation between Weber Integrals of Bessel Functions and Incomplete Cylindrical Functions 152
5. Discontinuous Integrals of Gallop and their Relation to Incomplete Cylindrical Functions 155
6. Sonine's Discontinuous Integral and its Connection with Incomplete Bessel Functions 160

Chapter VI. Integrals Involving Incomplete Cylindrical Functions 166

1. Improper Integral of Lipschitz-Hankel 166
2. Integrals of Weber Type Involving Incomplete Cylindrical Functions 168
3. Improper Integrals of Certain Incomplete Cylindrical Functions with Respect to Index 172
4. Some Discontinuous Integrals of Weber-Schafheitlin Type Involving Incomplete Cylindrical Functions 176
5. Improper Integrals of Hankel Type Involving Incomplete Cylindrical Functions 180
6. Definite Integrals Containing Incomplete Cylindrical Functions . . 184

Chapter VII. Application of Incomplete Cylindrical Functions to Problems of Wave Propagation and Diffraction 190

1. Connections between Incomplete Cylindrical Functions and some Tabulated Special Integrals 191
2. Absorption of Radiation in the Earth's Atmosphere 197
3. Radiation from a Vertical Dipole on the Earth's Surface 200

4. The Problem of Diffraction by a Wedge 205
5. Diffraction of Waves by a Screen of Given Form 213
6. Some Problems in the Theory of Diffraction in Optical Apparatus . 219

Chapter VIII. Application of Incomplete Cylindrical Functions to some Problems of Solid State Theory and the Motion of Charged Particles in Electromagnetic Fields 228

1. Computation of Radiation and Absorption Fields in the Theory of Multiphonon Processes 228
2. Scattering of Light by Atoms with Interference of Excited States . . 232
3. Motion of Charged Particles in Constant Electric and Time-Varying Magnetic Fields 237
4. Motion of Charged Particles in Changing Electric and Magnetic Fields 243

Chapter IX. Applications of Incomplete Cylindrical Functions to some Problems of Atomic and Nuclear Physics 249

1. Solution of a Particular Form of the Schrödinger Equation 249
2. Some Relations for Evaluating the Transparency Coefficients of Nuclei and the Average Loss of Impulse for Interaction of Particles with their Fields 253
3. Resonant Absorption of Radiation in Media of Finite Dimensions . . 256
4. Application of Incomplete Cylindrical Functions in the Study of a Heterogeneous Reactor with Small Number of Blocks 262
5. Application of Incomplete Cylindrical Functions to the Solution of the Diffusion Equation 267

Chapter X. Other Applied Problems Leading to Incomplete Cylindrical Functions 274

1. Excitation of Betatron Oscillations 274
2. Transient Processes in Electrical and Microphonic Circuits 274
3. Influence of Optical Systems on the Amplitude of Transmitted Waves 275
4. Density Perturbation in a Gas due to a Rapidly Moving Body . . . 275
5. Computation of the Sound Field in Closed Domains 279
6. Exchange Processes between Liquid and Solid Phases 280
7. Drift of Non-Fundamental Carriers in Semiconductors 282
8. Damping of Radiation in High Temperature Plasma in the Presence of Shielding 283
9. Other Special Integrals 285

Chapter XI. Compendium of Tables and Computation Formulae for Evaluation of Incomplete Cylindrical Functions 288

1. Incomplete Bessel Functions, Struve Functions, Anger Functions, and Weber Functions 288
2. Incomplete Hankel Functions and MacDonald Functions 291
3. Incomplete Lipschitz-Hankel Integrals 292
4. Incomplete Weber Integrals 294
5. Tables of Incomplete Cylindrical Functions 297
