INVITED PAPERS

Control of Functional Differential Equations with Function Space Boundary Conditions	1
<i>H. T. Banks</i>	
Numerical Methods for Functional Differential Equations	17
<i>C. W. Cryer</i>	
Some Harmless Delays	103
<i>Rodney D. Driver</i>	
Pattern Learning by Functional-Differential Neural Networks with Arbitrary Path Weights	121
<i>Stephen Grossberg</i>	
Differential Equations in Physiology and How to Find Them	161
<i>John A. Jacquez and Eugene Daniels</i>	
Basic Frequency Periodic Motions in Noncompact Dynamical Processes	185
<i>G. S. Jones</i>	
Asymptotic Behavior of Solutions of the Functional Differential Equation $y'(x) = ay(\lambda x) + by(x)$	197
<i>Tosio Kato</i>	
Oscillations of Higher-Order Retarded Differential Equations Generated by the Retarded Argument	219
<i>G. Ladas, V. Lakshmikantham, and J. S. Papadakis</i>	
Remarks on a Volterra Equation	233
<i>Jacob J. Levin</i>	
Asymptotic Stability and Perturbations for Linear Volterra Integrodifferential Systems	257
<i>Richard K. Miller</i>	
The Infinite Time Quadratic Cost Problem for Certain Classes of Infinite Dimensional Control Systems	269
<i>Sanjoy K. Mitter</i>	

A Deterministic Model of the Spread of an Infection
between Two Populations 281
Paul E. Waltman

CONTRIBUTED PAPERS

Inhomogeneous Functional and Operational Differential Equations 293
Clifford H. Anderson

On Asymptotic Solutions of Nonlinear Differential
Equations with Time Lag 299
George Bojadziev

Existence and Uniqueness Theorems for Differential
Equations with Deviating Arguments of Mixed Type 309
Forbes J. Burkowski

Admissibility Theory and the Global Behavior of
Solutions of Functional Equations 313
Herman E. Gollwitzer

Periodic Solutions of Liénard Equations with Delay:
Some Theoretical and Numerical Results 321
R. B. Grafton

Oscillatory Solutions of $x''(t) + a(t)f\{x[q(t)]\} = 0$ 335
T. Burton and R. Grimmer

An Optimization Problem for an n^{th} Order Scalar Neutral
Functional Differential Equation with Functional Side Conditions 345
Marc Q. Jacobs

A Comparison Theorem and Applications 353
George C. T. Kung

Oscillations of Nonlinear Functional Differential
Equations Generated by Retarded Actions 355
Gangaram S. Ladde

On the Solutions of a Nonlinear Volterra Equation 367
Stig-Olof Londen

Functional Differential Equations in Continuum Mechanics 369
Richard C. MacCamy

Optimal Control of Linear Systems with Time-Varying Lags 373
Henry M. Sendaula

The Flip-Flop Circuit as a Neutral Equation 387
Marshall Slemrod

SUBJECT INDEX 393
