<i>Preface</i>	vii
<i>Notations and Abbreviations</i>	xi

Chapter 1 Basic Properties of Lévy Concentration Functions

1.1	Definitions and Elementary Properties	1
1.2	Continuity Properties	10
1.3	Examples	12
1.4	Invariance Properties	15
1.5	Behavior of $Q(l)/l$	18
1.6	Relationship between Concentration Function and Variance	26
1.7	Multidimensional Case	30

Chapter 2 Concentration Functions of Convolutions

2.1	Upper and Lower Bounds	39
2.2	Kolmogorov Type Inequalities	46
2.3	Identical Factors	72
2.4	Asymptotic Estimations	78

Chapter 3 Convergence Problems

3.1	Auxiliary Results	81
3.2	Convergence Theorems	84
3.3	Essential Convergence	87

Chapter 4 Concentrations

4.1	Convergence Concentrations	101
4.2	Decomposition Concentrations	110
4.3	Information-Theoretical Concepts	114

Chapter 5 Generalizations

5.1	Preliminary Results	117
5.2	Concentration Functions in Metric Spaces	121
5.3	Concentrations in Hilbert Spaces	126
