

CONTENTS

PART 1. GENERAL THETA FUNCTIONS.....	1
Chapter I.	
Definitions and basic properties of theta functions with characteristics...	3
Chapter II.	
Theta indices and theta identities.....	19
1. Introduction and sample identities.....	19
2. The formal development of the calculus of theta indices.....	25
3. The theta identities.....	42
Appendix 1 to Chapter II.	
Explicit construction of principal sets of characteristics.....	55
Appendix 2 to Chapter II.	
Some identities obtained by rearrangement of summation.....	60
Appendix 3 to Chapter II.	
The Riemann theta formula.....	66
Chapter III.	
Transformation Theory.....	73
0. Introductory Remark.....	73
1. Motivation from Riemann surface theory.....	73
2. Some essential definitions and lemmas.....	82
3. Linear transformation of the thetas—Main theorems.....	86
4. Proof of Theorem A.....	90
5. Proof of Theorem B and Lemmas A and B.....	97
6. Proof of Theorem C.....	99
7. Proof of Theorem D.....	100
8. A numerical example.....	105
PART 2. APPLICATIONS TO RIEMANN SURFACES.....	117
Chapter IV.	
Riemann surface theory.....	119
1. Introduction.....	119
2. Definition of a Riemann surface.....	119
3. Topology of Riemann surfaces.....	122

4. Differentials on a Riemann surface.	127
5. Existence theorems.	130
6. Periods of holomorphic and meromorphic differentials.	130
7. The Riemann-Roch theorem and Abel's theorem.	135
8. Hyperelliptic surfaces.	144
Appendix to Chapter IV.	
An example: the surface $w^2 = z^6 - z$ and the matrix π.	155
Chapter V.	
Theta functions on a Riemann surface.	160
1. Basic theorems.	160
2. Some applications of the basic theorems.	175
3. Some special results on hyperelliptic surfaces.	181
Chapter VI.	
Applications of the theory of theta functions to Riemann surfaces.	187
1. Introduction.	187
2. Period relations.	188
3. Relations among quadratic differentials.	218
Appendix 1 to Chapter VI.	
Moduli and theta functions.	221
Appendix 2 to Chapter VI.	
Functional independence of Schottky-type period relations for genus five.	222
Index.	231
