Chapter	
1. Definitions and Overview	1
1. Small Classes of Recursive Functions	1
2. Bounded Arithmetic Predicates	3
3. Definitions of Function and Predicate Classes	5
4. Review of Known Results	9
5. Summary of the Thesis	11
2. Bounded Arithmetic Predicates	13
1. Introduction	13
2. Basic Properties and Simple Predicates	15
3. Closure Properties and Simplification of Bounds	23
4. Function Growth and the Exponential Predicate	32
5. Enumeration of Classes	38
3. Extensions of BA and Small Grzegorzcyk Classes	46
1. Introduction	46
2. Exponential Bounds	48
3. Bounded Exponential Arithmetic Predicates	51
4. Alternative Characterizations of $(\epsilon^n)_*$	58
5. Small Grzegorzcyk Classes	63
4. Limited Minimum Classes	69
1. Introduction	69
2. Technical Point: New Classes g^i , $g^i(x-1)$, $g^i(x-1)$	72

	<u>Page</u>
3. Limited Minimum Classes G^i	80
4. Classes of Relations $(H^n)_*$	91
5. Discussion and Open Problems	97
