PREFACE	ix
ACKNOWLEDGMENTS	xv
<b>1 Historical sketch</b>	
1.1 Introduction	1
1.2 The seventeenth century	2
1.3 The eighteenth century	3
1.4 The nineteenth century	4
1.5 The twentieth century	5
Notes	6
<b>2 Appell's symbol and hypergeometric series</b>	
2.1 Introduction	7
2.2 Appell's symbol	8
2.3 Vandermonde's theorem	12
2.4 Hypergeometric series	14
2.5 Wallis' formula for $\pi$	20
2.6 Arithmetic, geometric, and logarithmic means	21
2.7 Stirling's formula for $n!$	23
Notes	24
Formulary	25
Exercises	25

### 3 The gamma function

3.1	Introduction	31
3.2	Definition and difference equation	32
3.3	Analyticity	34
3.4	Limit formulas	35
3.5	Logarithmic convexity	38
3.6	The reciprocal of the gamma function	41
3.7	The duplication theorem	44
3.8	Stirling's formula in the complex plane	45
3.9	Euler's reflection formula	48
3.10	Inequalities	50
3.11	Euler measures	52
	Notes	54
	Formulary	54
	Exercises	55

### 4 The beta function

4.1	Introduction	59
4.2	The beta function of two variables	60
4.3	The beta function of several variables	61
4.4	Dirichlet measures	64
	Notes	68
	Formulary	69
	Exercises	69

### 5 Dirichlet averages

5.1	Introduction	73
5.2	The averaging process	75
5.3	Averages of derivatives	78
5.4	Euler-Poisson differential equations	80
5.5	Newton-Taylor series with remainder	84
5.6	Associated functions	88
5.7	Averages of power series	91
5.8	Averages of $e^x$	93
5.9	Averages of $x^t$	97
5.10	Confluence	102
5.11	Averages of Cauchy's integral formula	105
5.12	Averages of $e^{1-x}$	107
	Notes	116
	Formulary	116
	Exercises	118

**6 Averages of  $x^n$  and  $x'$** 

6.1	Introduction	128
6.2	Representation as a polynomial	129
6.3	Dirichlet averages with negative parameters	135
6.4	The binomial theorem	140
6.5	Linear transformation	141
6.6	Generating functions	142
6.7	Polynomials of Legendre, Gegenbauer, and Chebyshev	148
6.8	Analytic continuation of the $R$ function	153
6.9	The first quadratic transformation	159
6.10	The second quadratic transformation	164
6.11	Gegenbauer's product formula	171
	Notes	174
	Formulary	175
	Exercises	177

**7 Jacobi polynomials**

7.1	Taylor series and Jacobi series	189
7.2	Biorthogonality	192
7.3	The addition theorem for Gegenbauer polynomials	195
7.4	Asymptotic properties	197
7.5	Convergence of series	200
7.6	Jacobi series of an analytic function	203
7.7	Applications	206
7.8	Rodrigues' formula and orthogonality	209
7.9	Laguerre polynomials	211
7.10	Hermite polynomials	217
	Notes	221
	Exercises	221

**8 Averages of  $x'$** 

8.1	Evaluation of integrals	231
8.2	The Schwarz-Christoffel mapping and elliptic functions	233
8.3	Gauss's theorem and dependence on a small variable	240
8.4	Existence theorem for associated functions	245
8.5	Removal of integral parameters	248
	Notes	253
	Exercises	253

<b>9 Elliptic Integrals</b>	
9.1 Introduction	257
9.2 Symmetric standard functions	261
9.3 Reduction to standard functions	266
9.4 Applications	270
9.5 Landen's transformation	275
9.6 The duplication theorem	278
9.7 The addition theorem	281
9.8 A reduction theorem	283
Notes	287
Exercises	287
<b>A Notation for sets</b>	291
<b>B Integrals depending on a parameter</b>	292
<b>Solutions to exercises</b>	299
<b>References</b>	315
<b>INDEX</b>	323
