

## CONTENTS

EDITOR'S PREFACE . . . . .	iii
AUTHOR'S PREFACE . . . . .	v
A NOTE ON THE MEANINGS OF CERTAIN GRAPHOLOGICAL SYMBOLS . . . . .	vi
LIST OF FIGURES . . . . .	xii
THE AIMS OF THIS BOOK . . . . .	1
PART I SYSTEMIC FUNCTIONAL GRAMMAR IN A COGNITIVE MODEL OF COMMUNICATION: BASIC CONCEPTS AND CURRENT ISSUES . . . . .	3
Chapter 1 The need for a new model . . . . .	4
1.1.1 Relations to other approaches . . . . .	4
1.1.2 What is to be modelled? . . . . .	7
1.1.3 Criteria for evaluating alternative models . . . . .	9
1.1.4 Psycholinguistic investigation and transformational grammar . . . . .	10
1.1.5 Incorporation in an automaton: transformational and systemic grammars . . . . .	12
Chapter 2 System and function in a systemic functional grammar . . . . .	19
1.2.1 System networks: the expression of knowledge as procedures . . . . .	19
1.2.2 Halliday's concept of function . . . . .	25
1.2.3 How many functional components? . . . . .	26
1.2.4 Criteria for recognising functional components . . . . .	34
1.2.5 Towards a model with only a semantic level of system networks . . . . .	39
Chapter 3 Realisation at the level of form (and intonation) . . . . .	46
1.3.1 A comparison with transformational grammar . . . . .	46
1.3.2 The level of form . . . . .	47
1.3.3 The realisation component . . . . .	50
1.3.4 Realisation in other systemic grammars . . . . .	51
Chapter 4 The grammar as a cognitive model in an interacting mind . . . . .	54
1.4.1 Competence, performance and meaning potential . . . . .	54
1.4.2 A note on 'directionality' . . . . .	56
1.4.3 The components of the grammar . . . . .	57
1.4.4 The other components in a cognitive model of an interacting mind . . . . .	62
1.4.5 A note on facilitation . . . . .	65
1.4.6 Summary . . . . .	66

Chapter 5 Where discourse comes from: towards a sociolinguistic 'grammar' of discourse . . . . . 70

2.5.1 Potential and actual linguistic behaviour . . . . . 70

2.5.2 The first choice: to communicate or not? . . . . . 72

2.5.3 Choice of subject matter . . . . . 74

2.5.4 Choices between 'functions' . . . . . 75

2.5.5 Choices between channels, codes and languages . . . . . 78

2.5.6 Choices between dialects and accents . . . . . 81

2.5.7 Choices between registers . . . . . 84

2.5.8 Choices between Bernsteinian 'codes' . . . . . 86

2.5.9 Summary . . . . . 87

Chapter 6 Where sentences come from: congruence and relations between functional components . . . . . 88

2.6.1 The role of sentences in a 'sentence grammar' . . . . . 88

2.6.2 The input to the grammar: 'situations' and 'things' as referents . . . . . 88

2.6.3 The initial entry condition in other systemic grammars . . . . . 91

2.6.4 The first system network in the semantics: congruence . . . . . 91

2.6.5 Relations between the functional components . . . . . 94

Chapter 7 Where clauses and tone groups come from: 1 the interactional component of the semantics . . . . . 98

2.7.1 Knowledge of the universe and the illocutionary force network . . . . . 98

2.7.2 The meaning of illocutionary force: a first approach . . . . . 100

2.7.3 The illocutionary force network: the early choices . . . . . 102

2.7.4 The illocutionary force network: the more delicate choices . . . . . 107

2.7.5 Negative illocutionary acts . . . . . 109

2.7.6 The differences between requests and polarity information seekers . . . . . 110

2.7.7	The entry condition for the network in other systemic grammars and the problem of ruling out unacceptability . . . . .	112
2.7.8	The illocutionary force realisation rules in particular and realisation rules in general . .	115
2.7.9	The meaning of illocutionary force: some major issues . . . . .	124
2.7.10	'Performative' verbs reconsidered . . . . .	131
Chapter 8	Where clauses and tone groups come from: 2 the other functional components of the semantics . . . . .	134
2.8.1	The experiential component: transitivity and voice . . . . .	134
2.8.2	The experiential component: the realisation of transitivity features . . . . .	148
2.8.3	The experiential component: the cultural classification of processes . . . . .	151
2.8.4	The experiential component: the other system networks . . . . .	154
2.8.5	The thematic component . . . . .	157
2.8.6	The informational component . . . . .	164
2.8.7	The negativity component . . . . .	172
2.8.8	The logical relationships component . . . . .	176
2.8.9	The affective and modality components . . . . .	183
2.8.10	Integrating the realisations . . . . .	185
2.8.11	The question of 'functions' and the semantic representation . . . . .	189
Chapter 9	Where nominal groups come from: the semantics of referent things . . . . .	197
2.9.1	The question of semantic structure . . . . .	197
2.9.2	The congruence system network revisited . . . .	201
2.9.3	Three basic concepts in the semantics of referent things . . . . .	202
2.9.4	The interactional component . . . . .	206
2.9.5	The informational component (and some dependent experiential networks) . . . . .	209
2.9.6	The experiential component: cultural classification and number . . . . .	217
2.9.7	The experiential component: types of particularisation . . . . .	222

2.9.8	The experiential component: quantification . . .	224
2.9.9	The logical relationships component (and a note on the other three components) . . . . .	226
2.9.10	Integrating the realisations . . . . .	230
Chapter 10	The rest of the grammar . . . . .	233
2.10.1	Integrating the clause and clause element realisations . . . . .	233
2.10.2	The discourse organisational component . . . . .	234
2.10.3	From form to phonology: the end of the traditional tri-stratal model? . . . . .	240
2.10.4	From form to variations in air pressure . . . . .	242
2.10.5	Summary . . . . .	244
Chapter 11	Concluding statements . . . . .	245
2.11.1	The grammar and its output: a summary of how the model works . . . . .	245
2.11.2	A comparison with a current Hallidayan model . . . . .	248
2.11.3	The semantics revisited . . . . .	251
2.11.4	The need to relate the grammar to the other components of the mind . . . . .	253
2.11.5	The need for the mind to be an interacting mind: 'semantics' and 'pragmatics' . . . . .	254
2.11.6	Modelling social interaction: the place of a 'sentence grammar' . . . . .	255
2.11.7	Some 'deviations' from accepted linguistic theory . . . . .	256
2.11.8	Summary: the model so far and work to be done . . . . .	262
Appendix A:	The origins of this book . . . . .	266
Appendix B:	Systemic grammar and lexicalism . . . . .	269
Bibliography	. . . . .	271
Index of Personal Names	. . . . .	280
Index of Subjects	. . . . .	282

## LIST OF FIGURES

Figure 1	System network conventions and the possible selection expressions that they generate . . . . .	20
Figure 2	Types of choice in meaning . . . . .	28
Figure 3	A systemic functional model of language (ignoring non-intonational phonology) . . . . .	45
Figure 4	An elementary starting structure for the English clause	48
Figure 5	Halliday's 'structural analysis of a clause' . . . . .	53
Figure 6	The code of language (English) in a cognitive model of an interacting mind . . . . .	58
Figure 7	The preconditions for communication . . . . .	73
Figure 8a	Two types of purpose in communication . . . . .	76
Figure 8b	Straightness in communication . . . . .	77
Figure 9	Some choices in channel . . . . .	78
Figure 10	Some choices of code type and language . . . . .	79
Figure 11	Some choices of dialect and accent . . . . .	83
Figure 12	Some choices of register (simplified) . . . . .	85
Figure 13	The choice in 'code' (in Bernstein's sense) . . . . .	86
Figure 14	A tentative system network and some sample realisation rules for congruence in English . . . . .	93
Figure 15	Some principal system networks . . . . .	95
Figure 16	An illocutionary force system network for English . . . . .	103
Figure 17	Starting structures for the English clause and tone group . . . . .	116
Figure 18	Selected realisation rules for the illocutionary force network (for which see Figure 16) . . . . .	118
Figure 19	A notational variant for part of Figure 16 . . . . .	121
Figure 20	A 'line' notation for expressing conditional features in realisation rules (cp. Figure 18) . . . . .	122
Figure 21	A transitivity system network for English: action processes . . . . .	137
Figure 22	Selected realisation rules for the transitivity network (for which see Figure 21) . . . . .	149
Figure 23	A very tentative and partial system network and realisation rules for the cultural classification of 'affected-centred' processes in English . . . . .	153
Figure 24	A partial system network and realisation rules for theme in English . . . . .	161
Figure 25a	Partial system network and realisation rules for information distribution and information focus in English . . . . .	166
Figure 25b	A partial system network for redundancy balance (situation) in English . . . . .	170

Figure 26	A partial system network and realisation rules for polarity in English . . . . .	174
Figure 27	A highly abbreviated system network for logical relationships (situation) in English . . . . .	178
Figure 28	Partial system networks for the affective attitude, probability and modal system networks in English . .	183
Figure 29	The contribution of the realisation rules to the generation of a clause . . . . .	186
Figure 30	A 'displayed feature' semantic representation of an English clause . . . . .	194
Figure 31	Some nominal group structures for English . . . . .	204
Figure 32	A system network and sample realisation rules for interactant roles in English . . . . .	207
Figure 33a	A system network for the informational networks (and three dependent experiential systems) in English . .	210
Figure 33b	Some sample realisation rules for informational networks (and two dependent experiential networks) for English . . . . .	213
Figure 34	A very tentative and partial system network and realisation rules for the cultural classification of things in English, and the number network . . . .	218
Figure 35	The demonstration system and realisation rules for English . . . . .	223
Figure 36	A very partial system network and realisation rules for the abstract and cardinal quantification networks in English . . . . .	225
Figure 37	A partial system network for logical relationships (thing) in English . . . . .	228
Figure 38	The contribution of the realisation rules to the generation of a nominal group . . . . .	231
Figure 39	A formal and intonational representation of the realisations from the system networks in the 'core' semantics . . . . .	233
Figure 40	A tentative and partial system network and realisation rules for attention getting in English .	238
Figure 41	A formal and intonational representation of the realisations from the 'core' and 'discourse organisational' components of the semantics . . . . .	240
Figure 42	Two representations of the item-phonology and intonation of an English sentence . . . . .	241
Figure 43	An overview of the working of the central components of the grammar . . . . .	246
Figure 44	Relationships between functional components in English: a simplifying summary . . . . .	252
