

Preface	viii
1. The background to Hallidayan linguistics	1
1.1 Predecessors and principles: an introduction	1
1.2 Firth and Malinowski: language as a social phenomenon	4
1.3 System and structure	6
1.4 Criticisms of the Firthian view of language	9
1.5 The link with Halliday	13
2. Scale and Category linguistics	14
2.1 Introduction	14
2.2 The earliest work	14
2.3 Further development of the theory	15
2.3.1 The requirements of a linguistic theory	15
2.3.2 Grammar: scales and categories	16
2.3.2.1 Unit and rank	16
2.3.2.2 Structure and delicacy	17
2.3.2.3 Class	24
2.3.2.4 System	27
2.3.2.5 Exponence	27
2.3.3 Scale and Category theory and Bloomfieldian linguistics	28
2.4 Criticisms of Scale and Category theory	29
2.4.1 Criticisms concerned with rank	29
2.4.2 Criticisms concerned with class	33
2.4.3 Criticisms concerned with structure	34
2.4.4 Criticisms concerned with the taxonomic nature of Scale and Category linguistics	38
2.5 Conclusion	38
3. Towards a deep systemic grammar	40
3.1 Introduction	40
3.2 Systems and networks	40
3.3 'Deep' grammar and the priority of systemic relations	45
3.4 The functional components hypothesis	46
3.5 Realization	51
3.6 Concluding remarks	57
4. Sociological semantics	58
4.1 Introduction	58
4.2 Sociosemantic networks	58
4.3 Sociosemantics in a wider perspective	62
4.3.1 Language as a realization of the 'social semiotic'	62
4.3.2 The linguistic system	63
4.3.3 Text	63
4.3.4 Situation	64
4.3.5 Register	67

4.3.6	Code	67
4.3.7	The social structure	68
4.3.8	Halliday's sociolinguistic model: a summary	68
4.4	A semantic functional perspective on child language development	68
4.4.1	The general approach	68
4.4.2	The three phases of development: an overview	70
4.4.3	Phase I	71
4.4.4	Phase II	73
4.4.5	Phase III	74
4.4.6	Language and culture in mother tongue acquisition	75
4.5	Conclusion	75
5.	Systemic functional grammar: a critical appraisal	77
5.1	Introduction	77
5.2	The relationship between syntax and semantics	77
5.3	A behavioural or a general semantics?	81
5.4	The validity of the functional components hypothesis	83
5.5	The validity of the categories of field, tenor and mode, and their correlation with semantic choice	88
5.6	A brief critical appraisal of Halliday's work on 'learning how to mean'	90
5.7	Further comments on Halliday's general approach to linguistic theorizing	91
5.8	Concluding remarks	93
6.	Systemic syntax	94
6.1	Introduction	94
6.2	Fawcett's 'iconoclastic approach to Scale and Category grammar'	94
6.3	Hudson's work on systemic syntax	102
6.3.1	Stages in Hudson's work	102
6.3.2	General characteristics	102
6.3.2.1	The autonomy of levels	102
6.3.2.2	The goals of a grammar	103
6.3.2.3	The content of a grammar	104
6.3.3	The form of the grammar: Hudson's three systemic models	106
6.3.3.1	The 'English Complex Sentences' model	106
6.3.3.2	The 'Systemic generative grammar' model	113
6.3.3.3	The 'Arguments for a Non-Transformational Grammar' model: daughter dependency grammar	114
6.3.4	Recent developments in Hudson's work: 'word grammar'	123
6.4	Conclusion: semantically based or autonomous syntax?	125
7.	Systemic approaches to lexis, phonology and discourse	128
7.1	Introduction	128
7.2	Lexis	128
7.2.1	The basic problem	128
7.2.2	Lexis and grammar as distinct forms of patterning	129
7.2.3	Lexis as most delicate grammar	133
7.2.4	The practical study of lexis	136
7.3	Phonology	137
7.3.1	Introduction	137
7.3.2	Segments and syllables	138

7.3.3	Stress and intonation	139
7.3.4	Problems and counter-proposals	142
7.4	Discourse	148
7.4.1	Introduction: the background to discourse analysis	148
7.4.2	Discourse patterning in Halliday's models	150
7.4.3	The Sinclair and Coulthard model	151
7.4.4	Developments in the analysis of exchange structure	153
7.4.5	Discourse, speech acts and semantics in a systemic perspective	161
7.4.6	Discourse in systemic linguistics: concluding remarks	162
8.	Descriptions of English and other languages	164
8.1	Introduction	164
8.2	Descriptions of English	164
8.2.1	The scope of Halliday's descriptive work	164
8.2.2	Transitivity	164
8.2.3	Mood and modalization	171
8.2.4	Theme and information structure	176
8.2.5	Cohesion	179
8.2.6	Other descriptive work on English	188
8.3	Descriptions of other languages	191
8.4	Conclusion	192
9.	Applications of systemic linguistics	193
9.1	Introduction	193
9.2	Systemic linguistics in stylistic studies	193
9.2.1	Stylistic studies based on Scale and Category linguistics	193
9.2.2	Stylistic studies based on systemic functional grammar	197
9.3	Linguistics in education	201
9.4	Systemic linguistics and the computer simulation of discourse understanding and production	206
9.5	Conclusion	212
10.	Conclusion: some salient features of systemic models	214
10.1	A framework for the comparison of models	214
10.2	Features of systemic metatheories	216
10.2.1	Systemic linguistics and Moravcsik's common properties of metatheories	216
10.2.2	The range of facts which systemic grammars are intended to account for	216
10.2.3	The range of goals for systemic linguistics	221
10.2.4	The range of means for achieving the goals of systemic linguistics	223
10.2.5	Evaluation of metatheories	226
	Epilogue: towards the future	230
	Bibliography	231
	Index	245
