|----------------|--|-----|
| <i>Preface</i> | <i>page</i> | vii |
| 0 | Some Notation, Terminology and Basic Calculus | 1 |
| 1 | Introduction | 17 |
| 1.1 | A glimpse of objectives | 17 |
| 1.2 | What are maximum principles? | 19 |
| 1.3 | On reflection in hyperplanes | 24 |
| 1.4 | What is symmetry? | 27 |
| 1.5 | Exercises | 32 |
| 2 | Some Maximum Principles for Elliptic Equations | 39 |
| 2.1 | Linear elliptic operators of order two | 39 |
| 2.2 | The weak maximum principle | 41 |
| 2.3 | The boundary-point lemma and the strong maximum principle | 50 |
| 2.4 | A maximum principle for thin sets Ω | 56 |
| 2.5 | Steps towards Phragmén–Lindelöf theory | 61 |
| 2.6 | Comparison functions of Siegel type | 72 |
| 2.7 | Some Phragmén–Lindelöf theory for subharmonic functions | 77 |
| 2.8 | Exercises | 84 |
| 3 | Symmetry for a Non-linear Poisson Equation in a Symmetric Set Ω | 87 |
| 3.1 | The simplest case | 87 |
| 3.2 | A discontinuous non-linearity f | 93 |
| 3.3 | Exercises | 101 |
| 4 | Symmetry for the Non-linear Poisson Equation in \mathbb{R}^N | 106 |
| 4.1 | Statement of the main result | 106 |
| 4.2 | Four lemmas about reflection of v | 111 |
| 4.3 | Proof of Theorem 4.2 and a corollary | 120 |

| | | |
|----------|--|------------|
| 4.4 | Application to some Newtonian potentials | 122 |
| 4.5 | Exercises | 133 |
| 5 | Monotonicity of Positive Solutions in a Bounded Set Ω | 141 |
| 5.1 | Prospectus | 141 |
| 5.2 | On the geometry of caps and reflected caps | 142 |
| 5.3 | Monotonicity in Ω | 153 |
| 5.4 | A little topology | 159 |
| 5.5 | Exercises | 162 |
| | Appendix A. On the Newtonian Potential | 167 |
| A.1 | Point sources in \mathbb{R}^3 | 167 |
| A.2 | The Newtonian potential: first steps | 174 |
| A.3 | Continuity of the force field ∇u | 194 |
| A.4 | Multipoles and the far field | 199 |
| A.5 | Second derivatives of u at points in G | 203 |
| A.6 | Exercises | 213 |
| | Appendix B. Rudimentary Facts about Harmonic Functions and the Poisson Equation | 221 |
| B.1 | Real-analytic functions | 221 |
| B.2 | Smoothness and mean-value properties of harmonic functions | 224 |
| B.3 | The Kelvin transformation | 232 |
| B.4 | On the Dirichlet and Neumann problems | 235 |
| B.5 | The solution of the Dirichlet problem for a ball | 248 |
| B.6 | Exercises | 262 |
| | Appendix C. Construction of the Primary Function of Siegel Type | 270 |
| | Appendix D. On the Divergence Theorem and Related Matters | 279 |
| D.1 | A first divergence theorem | 279 |
| D.2 | Extension to some sets with edges and vertices | 285 |
| D.3 | Interior approximations to the boundary $\partial\Omega$ | 293 |
| D.4 | Exercises | 300 |
| | Appendix E. The Edge-Point Lemma | 305 |
| E.1 | Preliminaries | 305 |
| E.2 | Bluntness and ellipticity under co-ordinate transformations | 309 |
| E.3 | Two stages of the edge-point lemma | 311 |
| | <i>Notes on Sources</i> | 324 |
| | <i>References</i> | 332 |
| | <i>Index</i> | 337 |
