Introduction	13
1 Preparatory Material	17
1.1 Manifolds, Vector Fields	17
1.1.1 Manifolds, Submanifolds	17
1.1.2 Tangent Spaces and Tangent Bundles	19
1.1.3 Vector Fields	21
1.1.4 Trajectories	22
1.1.5 Cotangent Bundles	23
1.2 Functional Analysis	24
1.2.1 Banach Spaces	24
1.2.2 Linear Operators in Banach Spaces	26
1.2.3 Linear Operators in Hilbert Spaces	30
1.3 Distributions. Fourier Transforms	34
1.3.1 Test Functions	34
1.3.2 Distributions. Definitions and Main Properties	35
1.3.3 Differentiation of Distributions and Multiplication by Functions	37
1.3.4 Fourier Transforms of Distributions	40
1.3.5 Distributions on a Manifold	42
1.4 Spaces of Distributions. Embedding Theorems	44
1.4.1 Weight Functions	44
1.4.2 The Spaces \mathbf{H}^μ	45
1.4.3 The Spaces $\mathbf{H}^\mu(\Omega)$	47
1.4.4 Embedding Theorems	48
1.4.5 Restrictions of Elements in \mathbf{H}^μ to Subspaces in \mathbb{R}^n	50
1.4.6 The Spaces $\mathbf{H}^{(s)}(\Omega)$ when Ω is a Manifold	54
1.5 Pseudo-Differential Operators	55
1.6 Elliptic Boundary Problems	63
1.6.1 The Dirichlet Problem	64
1.6.2 The Maximum Principle	65
1.6.3 Green's Formula	66
1.6.4 Strong Solvability of the Dirichlet Problem	67
1.6.5 Weak Solvability of the Dirichlet Problem	68
1.6.6 General Boundary Problems	69

1.6.6.1.	Elliptic Boundary Problems in a Half-space	69
1.6.6.2	Elliptic Boundary Problems in Bounded Domains	71
1.6.6.3	Elliptic Boundary Problems for Second-order Operators	73
1.6.6.4	The Oblique Derivative Problem	75
1.7	Some Auxiliary Results from Analysis	76
2	Statement of the Problem and Main Results	79
2.1	The Poincaré Problem	79
2.2	Problem (\mathcal{P}) (Modified Poincaré Problem)	81
2.2.1	Some Geometric Notions	81
2.2.2	Statement of Problem (\mathcal{P})	83
2.3	Reduction of Problem (\mathcal{P}) to the Boundary Manifold \mathbf{M}	85
2.4	Spaces	86
2.4.1	Coordinates	86
2.4.2	The Spaces $\mathcal{H}_k(\mathbf{M}, \mu_2)$ and $H_{m,r}(\Omega, \mu_2)$	87
2.5	Main Results and Discussions	89
3	The Poincaré Problem: Degeneracy on a Manifold	93
3.1	Some Additional Notations and Definitions	94
3.2	Statement of the Results	97
3.3	<i>A priori</i> Estimates for the Operator \mathcal{A}	105
3.3.1	Estimates for the Operator \mathcal{A} Near the Submanifold μ	105
3.3.1.1	L_2 - Estimates	105
3.3.1.2	Estimates in (Weighted) $H^{(s)}$ -Spaces	112
3.3.2	<i>A priori</i> Estimates far from μ	120
3.3.3	Global <i>a priori</i> Estimates	123
3.3.3.1	L_2 - Estimates for the Operators $\mathcal{A}_{\lambda\varepsilon}$, $\varepsilon > 0$	123
3.3.3.2	L_2 - Estimates for the Operators \mathcal{A}_λ	124
3.3.3.3	Weighted $H^{(s)}$ -Estimates for Operator $\mathcal{A}_{\lambda\varepsilon}$	127
3.3.3.4	Weighted $H^{(s)}$ -Estimates for the Operator \mathcal{A}_λ	128
3.4	Solvability of the Reduced Problem (\mathcal{P}_M)	130
3.5	Proofs of Theorems 3.1-3.4	142
3.5.1	Proof of Theorem 3.1	142
3.5.2	Proof of Theorem 3.2	143
3.5.3	Proof of Theorem 3.3	145
3.5.4	Proof of Theorem 3.4	146
3.6	Proofs of the Theorems on Asymptotics	147
3.6.1	Proof of Theorem 3.7	147
3.6.2	Proof of Theorem 3.6	153
3.6.3	Proof of Lemma 3.8	155
3.6.4	Proof of Theorem 3.9	156

4	Regularity of Solutions of the Poincaré Problem	157
4.1	Sharp Regularity Estimates for Solutions of Problem (\mathcal{P})	158
4.1.1	The Classes \mathcal{G} and \mathcal{W}	159
4.1.2	Spaces and Norms	164
4.1.3	The Main Results	166
4.1.4	Proof of Theorem 4.8	172
4.1.5	Proof of Theorem 4.9	181
4.1.6	Proof of Theorem 4.6	183
4.1.7	Proof of Theorem 4.7	185
4.2	Coercive Estimates	186
4.2.1	The Main Results	187
4.2.2	Proof of Theorem 4.14	189
4.2.3	Proof of Theorem 4.13	198
4.3	Lemmas on Ordinary Differential Operators with Parameter	200
5	The Poincaré Problem: The General Case. Proofs of the Main Results	209
5.1	Some Properties of the Spaces $\mathcal{H}_k(M, \mu_2)$	210
5.1.1	Operators in the Spaces $\mathcal{H}_k(M, \mu_2)$	210
5.1.2	Coordinate Systems	212
5.1.3	Quasipartition of Unity	214
5.1.4	Equivalent Norms in the Spaces $\mathcal{H}_k(M, \mu_2)$	216
5.2	<i>A priori</i> Estimates for the Operator $\mathcal{A}_{\lambda\varepsilon}$ in Γ	223
5.2.1	L_2 - Estimates for the Operator $\mathcal{A}_{\lambda\varepsilon}$, $\varepsilon > 0$	223
5.2.2	Weighted H^s - Estimates of the Operator $\mathcal{A}_{\lambda\varepsilon}$	233
5.3	<i>A priori</i> Estimates of the Operator \mathcal{A}_λ	240
5.3.1	The General Case of the Vector Field I	240
5.3.2	The Vector Field I Satisfies Condition 7°	245
5.4	Global <i>a priori</i> Estimates	250
5.4.1	Estimates for the Operator $\mathcal{A}_{\lambda\varepsilon}$	250
5.4.2	Estimates for the Operator \mathcal{A}_λ	254
5.5	The Solvability of Problem (\mathcal{P}_M)	256
5.6	The Proofs of the Main Results	275
5.6.1	Proof of Lemma 2.1	275
5.6.2	Proof of Lemma 2.2	276
5.6.3	Proof of Theorem 2.3	277
5.6.4	Proof of the Maximum Principle	284
5.6.5	Proof of Theorem 2.5	289
5.6.6	Proof of Theorem 2.6	289
6	Some Additional Results	291
6.1	The Vector Field τ not Transversal to μ_{12}	291
6.2	Solvability of Problem (\mathcal{P}) in the Spaces C^λ	292
6.3	Another Approach to the Poincaré Problem	293
6.4	The Case of a Singular Vector Field I	294

6.5	Nonscalar Oblique Derivative Problems	295
6.5.1	Maximum Principle for Weakly Coupled Boundary Problems.	295
6.5.2	On the Solvability of Some Poincaré-type Problems for Elliptic Systems.	299
6.6	Second-order Boundary Operators	309
6.6.1	Boundary Operators with a Definite Quadratic Form. The Wentzell Boundary Condition	309
6.6.2	Boundary Operators with an Indefinite Quadratic Form	315
6.7	A Return to Regularity	318
6.8	More General Boundary Conditions	321
	Appendix. Some Unsolved Problems	327
	Bibliographical Notes	331
	Bibliography	337
	Index	343
	Symbol Index	345
