LIST OF FIGURES	xii
1. INTRODUCTION	1
1. Uses of phonetics	1
2. The phases of speech	3
3. The vocal tract	7
4. The functional components of speech	10
2. BASIC COMPONENTS OF SPEECH	11
1. Initiation and articulation	11
2. Fricative and stop articulation	17
3. Pulmonic pressure and suction initiation	19
4. Glottalic initiation	23
5. Velaric initiation	28
6. Review of initiation types	30
7. Initiator velocity, and initiator power (stress)	32
3. PHONATION: A THIRD BASIC COMPONENT	36
1. Voiceless and voiced fricatives	36
2. Voiced and voiceless <i>m n l r</i>	39
3. Voiced and voiceless vowels	41
4. The three components: initiation, articulation, and phonation	42
5. The production of voiced stops	43
6. Voiced implosives	49
7. Principal phonation types	51
8. Relationship of phonation to initiation	56
9. Aspiration	57
4. ARTICULATION: STRICTURE TYPES	62
1. Articulation—the 'final shaping' of sounds	62
2. Maintainable stricture-types: stop, fricative, approximant, resonant, trill	63
3. Essentially momentary stricture types: tap, flap, semivowel	70

4. The transverse dimension: median and lateral articulation	73
5. ARTICULATION: LOCATIONS	76
1. The nasal area	76
2. The oral area: upper and lower articulators	79
3. Labial articulations: bilabial and labiodental	83
4. Dentalveolar articulations	86
5. Retroflex and palatal articulations	92
6. Velar and uvular articulations	96
7. Pharyngeal and glottal articulations	100
6. CO-ARTICULATION AND SEQUENCES	103
1. Co-ordinate or double articulation	104
2. Primary and secondary articulation	105
3. Homorganic sound sequences : geminates and affricates	110
4. Lateral plosion, nasal plosion, and prenasalized stops	113
5. Heterorganic sequences and contiguous sequences	114
6. Diphthongs	115
7. Close and open transition	116
7. VOWELS: INTRODUCTION	123
1. Vowels and consonants: importance of silent study of vowels	123
2. Lip- and tongue-positions for vowels	124
3. Introduction to Cardinal Vowels	130
8. THE CARDINAL VOWELS (CVs)	138
1. General characteristics of CVs: errors to avoid	138
2. The front CVs	142
3. The back CVs	145
4. Types of lip-rounding	149
5. Secondary CVs	150
6. Central vowels and other additions to the CVs	154
7. The acoustics of vowels: vowel formants	159
8. Making the formants audible	163
9. Additional vowel modifications	169

9. PROSODIC FEATURES	172
1. Initiatory prosodies: initiator power (= stress)	172
2. The syllable	178
3. The foot	180
4. Phonatory prosodies: pitch variations (= intonation and tone)	182
5. Articulatory prosody: duration of articulation (= length)	184
10. SOUND SYSTEMS OF LANGUAGES	187
1. Phonology: the utilization of speech-sounds	187
2. A continuum of vowel-sounds	188
3. The vowel continuum differently dissected by English and Spanish	190
4. Voice-onset-times differently exploited by different languages	191
5. Phonemes	198
6. Distinctive features	200
7. English consonant phonemes	202
8. Allophones	203
9. Consonant clusters	207
10. The English vowels	210
11. REVIEW	217

INDEX	233

List of Figures

1. The vocal tract	8
2. Basic components of speech-sound production	13
3. Experiment 3: Remove initiation	13
4. Experiment 4: Remove articulation	15
5. Experiment 5: Add initiation	16
6. Experiment 6: Add articulation	16
7. Experiment 7: Superimpose stop on air-stream	18
8. Pressure and suction varieties of [f]	21
9. Pressure and suction varieties of [s]	22
10. Three stages in the production of glottalic pressure [k']	23
11. Experiment 17: Three phases in the production of a velaric suction stop (the click [ɰ])	29
12. Experiment 23: Voiceless and voiced fricatives	38
13. Aerodynamics of a voiced stop	46
14. Voiceless and voiced stop and fricative	48
15. Mechanism of voiced glottalic suction stop (voiced implosive)	49
16. Initiation of voiced plosives and voiced implosives	51
17. States of the glottis	54
18. Aspiration and voicing of stops	58
19. Major stricture types	73
20. Major stricture types in the transverse dimension	75
21. The major articulatory areas	77
22. Some features of the oral cavity	79
23. Upper articulatory locations	80
24. Subdivisions of the tongue	81
25. Lower articulatory locations	82
26. Two extreme types of alveolar ridge	87
27. Apico-dentalveolar stop articulations	87
28. Lamino-dentalveolar stop articulations	88
29. Apico-dentalveolar fricative articulations	90
30. Lamino-dentalveolar fricative articulations	90
31. Retroflex articulations: (a) stop (b) flap	93

List of Figures

xiii

32. Dorso-palatal articulation	93
33. Some postalveolar and (pre)palatal articulations	96
34. Timing relations in co-articulation	107
35. Named homorganic sequences	111
36. The International Phonetic Alphabet (revised to 1979)	120
37. The vowel limit	132
38. Tongue-configurations for Cardinal Vowels	133
39. Error to avoid in pronouncing front CVs	135
40. The Cardinal Vowels	136
41. Schematic representation of lip-positions of Cardinal Vowels	146
42. (Primary) and secondary Cardinal Vowels	149
43. Additional vowels	155
44. First and second formants of Cardinal Vowels	161
45. Cardinal Vowels with frequencies of F1 and F2 (Hz) superimposed	162
46. Cardinal Vowel charts with doh-ray-me superimposed	167
47. Pitch-schemes of nouns and verbs	176
48. Stress differences on uniform pitch	177
49. Stress-groups, or feet	181
50. The i-a vowel continuum	189
51. The i-a vowel continuum: English and Spanish divisions	191
52. The VOT continuum	193
53. Labial stops in Hindi and Sindhi	197
