

Contents

1 Examples, 3

- A. Logistic Maps, 4
- B. Graphical Analysis, 5
- C. Hénon Maps, 9
- D. The Standard Map Family, 12
- E. Arnold's Circle Maps, 13
- F. Quadratic Maps, 14
- G. Duffing's Equation, 15
- H. Interesting Maps, 16
- I. Problems, 17
- J. Further Reading, 17

2 Dynamical Systems, 18

- A. Discrete and Continuous Dynamical Systems, 18
- B. Omega Limit Sets, 21
- C. Epsilon Chains, 25
- D. The Conley Decomposition Theorem, 28
- E. Directed Graphs, 30
- F. Local Analysis of Orbits, 31
- G. Summary, 33
- H. Problems, 33
- I. Further Reading, 34

3 Hyperbolic Fixed Points, 35

- A. Linearization, 35
- B. Stable and Unstable Manifolds, 39
- C. Shadowing and Structural Stability, 49
- D. The Hartman–Grobman Theorem, 51
- E. Smale's Horseshoe Map and Symbolic Dynamics, 54
- F. Hyperbolic Invariant Sets, 58
- G. Trellis Structure and Resonance Zones, 59

- H. Topological Entropy, 70
 - I. Problems, 71
 - J. Further Reading, 72
- 4 Isolated Invariant Sets and Isolating Blocks, 73**
- A. Attracting Sets, 73
 - B. Isolated Invariant Sets and Isolating Blocks, 77
 - C. Constructing Isolating Blocks, 82
 - D. Basic Sets, 83
 - E. Symbolic Dynamics, 83
 - F. Filtrations of Isolated Invariant Sets, 85
 - G. Stacks of Isolating Blocks, 86
 - H. Calculating Directed Graphs, 88
 - I. Further Reading, 92
- 5 The Conley Index, 93**
- A. The Conley Index of an Isolating Block, 93
 - B. Continuation of Isolated Invariant Sets, 96
 - C. The Homology Conley Index, 98
 - D. References, 102
- 6 Symplectic Maps, 103**
- A. Linear Symplectic Maps, 103
 - B. Classical Mechanics, 107
 - C. Variational Principles, 110
 - D. Generating Functions, 113
 - E. Symplectic Integrators, 117
 - F. Separatrix Movement, 118
 - G. Normal Forms, 121
 - H. Problems, 125
 - I. Further Reading, 125
- 7 Invariant Measures, 126**
- A. Measure Spaces, 126
 - B. Invariant Measures, 127
 - C. Further Reading, 130
- Appendix A Metric Spaces, 131**
- A. Definitions, 131
 - B. The Hausdorff Metric, 134
 - C. Fractals, 135
- Appendix B Numerical Methods for Ordinary Differential Equations, 137**
- Appendix C Tangent Bundles, Manifolds, and Differential Forms, 142**

Appendix D Symplectic Manifolds, 147

Appendix E Algebraic Topology, 149
