CONTENTS

ACKNOWLEDGMENTS

INTRODUCTORY REMARKS 1
Why study the history of twentieth-century phonology? 1
Motivations for the present book 7
The historical origins of modern views: A concrete example 10
The organization of the present book 14

1 FERDINAND DE SAUSSURE 17
The Saussurean view of language, languages, and linguistics 23
The linguistic sign 26
The relation of languages to their history 28

2 SAUSSURE'S VIEWS ON SOUND STRUCTURE 33
Sounds, sound images, and their study 34
'*Phonèmes*' and 'phonetic species' 37
The linguistic representation of *signifiants* 40
Some approaches to the study of phonological differences 43
Saussure's description of alternations 50
Saussure and the phonological tradition 55

3 THE KAZAN SCHOOL: BAUDOUIN DE COURTENAY AND KRUSZEWSKI 56
Biographical remarks 57
The study of sound systems in the Kazan school 61
The nature of phonological structure 65
Kruszewski's theory of alternations 68
Baudouin's development of the theory of alternations 73
The later history of 'Kazan phonology' 79

4 PRAGUE SCHOOL PHONOLOGY FROM THE MOSCOW CIRCLE THROUGH TRUBETZKOY'S *GRUNDZÜGE* 83
The background of the Prague Circle and the life of Trubetzkoy 84
Units in phonological analysis 91
The structure of phonological systems 96
Suprasegmental properties 100
Neutralization, archiphonemes, and markedness 106
Morpho(pho)nology 112

5 ROMAN JAKOBSON AND THE THEORY OF DISTINCTIVE FEATURES 116
Origins of the distinctive feature theory 117
Developing the theory of distinctive features 120
The adequacy of Jakobson's distinctive features 124
Kindersprache, Aphasie und allgemeine Lautgesetze 129
Information theory and Jakobson's legacy 134

6 THE 'GLOSSEMATIC' THEORY OF LOUIS HJELMSLEV 140
Hjelmslev's life and career 142
Hjelmslev's notion of an 'immanent' linguistics 146
Basic terms of glossematic analysis 150
Hjelmslev's approach to the description of sound structure 154
The role of simplicity in a glossematic description 160
Nonsegmental structure in glossematic phonology 165

7 J. R. FIRTH AND THE LONDON SCHOOL OF PROSODIC ANALYSIS 169
Henry Sweet, Daniel Jones, and the British phonetic tradition 171
J. R. Firth's life 177
The Firthian view of language and linguistics 180
Systems and structures, sounds and prosodies 183
Relations between prosodic and other approaches to phonology 189

8 FRANZ BOAS AND THE BEGINNINGS OF AMERICAN LINGUISTICS 194
William Dwight Whitney 194
Early work on American Indian languages 196
Franz Boas 198
Linguistic theory and Boas's *Handbook* 201
Boas's views of phonology 204
Representation and rules in Boas's descriptions 209
Abstractness in Boas's phonological practice 213

9 EDWARD SAPIR 217
Sapir's life 217
Sapir's view of the nature of language 221
Sapir's conception of phonological structure 228
Sapir's descriptive practice in phonology 232
Rules and their interactions in Sapir's phonology 236
The relation between rules and representations 239
Appendix: Abstractness and Sapir's analysis of Southern Paiute 243

10 LEONARD BLOOMFIELD 250
Bloomfield's life and career 251
Bloomfield's view of language, linguistics, and psychology 254
Bloomfield's conception of the phoneme 259
Representations in Bloomfield's phonology 262
The 'abstractness' of phonemic representations 266
Morphophonemics and the description of alternations 270

11 AMERICAN STRUCTURALIST PHONOLOGY 277
Some prominent American structuralists 277
The American structuralist view of language 280
Initial formulations of the notion of 'phoneme' 286
Twaddell's "On Defining the Phoneme" 290
Subsequent developments in structuralist phonemics 295
American structuralist morphophonemics 301
Rule interactions and the nature of descriptions 306

12 GENERATIVE PHONOLOGY AND ITS ORIGINS 310
The decline and fall of American structuralism 311
The ascendancy of generative phonology 314
Morris Halle and the bases of generative phonology 318
The antecedents of generative phonological theory 322

13 GENERATIVE PHONOLOGY AFTER *THE SOUND PATTERN OF ENGLISH* 328
The nature of the SPE program 329
The problem of phonetic content within the SPE theory 331
How abstract are phonological representations? 336
Constraining representations: 'Natural generative phonology' 339
Constraining rules: Natural phonology 342
Autosegmental and metrical formalisms 347
