Preface and Orientation	xi
For the Sloan Foundation	xv
<i>Robert Q. Marston</i>	
Neoconstructivism:	
A Unifying Theme for the Cognitive Sciences	
<i>Stevan Harnad</i>	1
Constructivism in Mathematics	2
Underdetermination and Unification in Science	3
Theory in Psychology	4
Neoconstructivism in Cognitive Science	4
Rival Views of Cognitive Science	6
1. Logic, Reasoning, and Logical Form	
<i>Gilbert Harman</i>	13
2. Variable-Free Semantics with Remarks on Procedural Extensions	
<i>Patrick Suppes</i>	21
Generative Grammars and Their Semantics	22
Procedural Semantics	29
3. Speaking of Imagination	
<i>Zeno Vendler</i>	35
	vii

4. Artificial Intelligence and Semantic Theory		45
<i>Martin Ringle</i>		
Two Approaches to Semantics	45	
Procedural Semantics	47	
Heterogeneity in Lexical Schemata	52	
Dimensions of Context	56	
5. Intensional Logic and Natural Language		65
<i>Barbara H. Partee</i>		
Introduction	65	
Intensional Logic	68	
The Problem	71	
6. How Far can you Trust a Linguist?		75
<i>James D. McCawley</i>		
7. Propositional and Algorithmic Semantics		89
<i>Franz Oppacher</i>		
Davidson's Approach	90	
Possible-Worlds Semantics	93	
Concepts and Procedures	95	
8. Inference in the Conceptual Dependency Paradigm: A Personal History		103
<i>Roger C. Schank</i>		
Introduction	103	
Our Present Analysis of Inference Types	125	
Overview	126	
9. Implications of Language Studies for Human Nature		129
<i>Margaret A. Boden</i>		
Introduction	129	
The Embodiment of Human Being	129	
The Complexity of the Mind	136	
Conclusion	141	
10. Experiential Factors in Linguistics		145
<i>George Lakoff</i>		
11. Grammar and Sequencing in Language		157
<i>Robert J. Scholes</i>		
Strategy in Psycholinguistics	158	
Structure and Sequence in Grammar	159	

Syntax as Order and Order as Syntax	160
Grammar and Sequencing in	
Language Disorders: Paraphasias	163
Summary of Paraphasic Lacunae	170
Syntax and Order in Behavior	172
Some Heuristics Regarding Sequencing	
in Psycholinguistics	173
Sequencing and Syntax a la Sapir	174
Summary and Conclusion	175

12. Psycholinguistic Experiment and Linguistic Intuition

Virginia Valian

179

13. Metaphor and Mental Duality

Stevan Harnad

189

Premises	189
Discrimination and Memory Limits	190
Induction and Reduction	191
Context and Continuity	193
Engrams, Invariants, and Category Boundaries	194
A Cognitive Bifurcation:	
Bounded and Unbounded Engrams	195
Interactions Between Bounded and Unbounded	
Representational Systems: Language and Images	197
Propositions and Communication	199
Bivalence	200
Propositions and Appositions	201
Exegesis	202
Affect	203
Metaphor	204
The Real World and the Real Brain	205
Glossary	207

14. Computations and Representations

Karl H. Pribram

213

Introduction	213
Re-Presentation	214
Isomorphism	215
Complimentation and Coordinate Structures	215
Neural Holograms	216
Neural-Mental Re-Presentations	217
Information Processing	218
Episodic Processing	219

Cognitive Controls	220
Human Languages	221
Epilogue	221

15. The Cognitive Sciences: A Semiotic Paradigm

Charls Pearson

225

Introduction 225

Semiotic Background 226

Universal Sign Structure Theory 227

Semiotic Analyses of Representation 233

Representation and Cognitive Science 237

Summary 239

16. Animal Communication as Evidence of Thinking

Donald R. Griffin

241

**17. Philosophy of Science and Recent Research
on Language, Mind, and Brain**

Richard S. Rudner

251

Author 255

Subject Index 261
