<b>Introduction</b>	<b>xii</b>
<b>Notations</b>	<b>xvii</b>
<b>1 Basic examples</b>	<b>1</b>
1.1 Introduction . . . . .	1
1.2 The Haar system . . . . .	2
1.3 The Schauder hierarchical basis . . . . .	10
1.4 Multivariate constructions . . . . .	16
1.5 Adaptive approximation . . . . .	22
1.6 Multilevel preconditioning . . . . .	33
1.7 Conclusions . . . . .	40
1.8 Historical notes . . . . .	41
<b>2 Multiresolution approximation</b>	<b>43</b>
2.1 Introduction . . . . .	43
2.2 Multiresolution analysis . . . . .	45
2.3 Refinable functions . . . . .	57
2.4 Subdivision schemes . . . . .	63
2.5 Computing with refinable functions . . . . .	70
2.6 Wavelets and multiscale algorithms . . . . .	74
2.7 Smoothness analysis . . . . .	83
2.8 Polynomial exactness . . . . .	89
2.9 Duality, orthonormality and interpolation . . . . .	94
2.10 Interpolatory and orthonormal wavelets . . . . .	99
2.11 Wavelets and splines . . . . .	107
2.12 Bounded domains and boundary conditions . . . . .	120
2.13 Point values, cell averages, finite elements . . . . .	131
2.14 Conclusions . . . . .	150
2.15 Historical notes . . . . .	151

<b>3 Approximation and smoothness</b>	<b>155</b>
3.1 Introduction . . . . .	155
3.2 Function spaces . . . . .	159
3.3 Direct estimates . . . . .	165
3.4 Inverse estimates . . . . .	171
3.5 Interpolation and approximation spaces . . . . .	174
3.6 Characterization of smoothness classes . . . . .	182
3.7 $L^p$ -unstable approximation and $0 < p < 1$ . . . . .	187
3.8 Negative smoothness and $L^p$ -spaces . . . . .	199
3.9 Bounded domains . . . . .	208
3.10 Boundary conditions . . . . .	216
3.11 Multilevel preconditioning . . . . .	226
3.12 Conclusions . . . . .	239
3.13 Historical notes . . . . .	240
<b>4 Adaptivity</b>	<b>243</b>
4.1 Introduction . . . . .	243
4.2 Nonlinear approximation in Besov spaces . . . . .	248
4.3 Nonlinear wavelet approximation in $L^p$ . . . . .	254
4.4 Adaptive finite element approximation . . . . .	262
4.5 Other types of nonlinear approximations . . . . .	267
4.6 Adaptive approximation of operators . . . . .	276
4.7 Nonlinear approximation and PDE's . . . . .	289
4.8 Adaptive multiscale processing . . . . .	296
4.9 Adaptive space refinement . . . . .	306
4.10 Conclusions . . . . .	317
4.11 Historical notes . . . . .	318
